

size it up!

MOHAN KRISHNAN

You can't just call them personal digital assistants any longer. Most PDAs now offer Internet connectivity and come with pocket versions of your

regular software such as Word and Excel. Others have even covered personal entertainment with built-in MP3 players and support for watching movie clips. Here's a look at some next-generation handhelds.

Sony Clie PEG N-710C Pure Entertainment

The Sony Clie is not just a PDA, it's also a personal entertainment organiser, with an in-built MP3 player, audio software and a high-resolution reflective TFT colour display (320x320 pixels) screen that can even be used for watching movie clips. The 33-MHz Motorola Dragonball VZ processor with the Palm OS forms the basic framework for this device.

HP Jornada 720 PDA Powerhouse

A convenient PDA that also provides Internet connectivity, the HP Jornada 720 sports a 206 MHz processor with 32 MB SDRAM and also offers 2D graphics acceleration. There's an in-built 56K modem, and also USB support. It weighs 510 grams and comes with the Pocket Office suite. The 6.5-inch colour display is capable of 65,536 colours and a maximum resolution of 640x240 pixels. You can also record notes using the built-in voice recorder.

Psion Revo Plus Mobile Internet Organiser

At 200 grams, this mobile organiser doesn't weigh you down even though it's loaded with features. Revo Plus comes with an ARM 710 core running at 36 MHz. It includes standard features such as a calculator, scheduler, alarms, etc, and you can specify different alarms that will set off at the appropriate times. Colour display is still missing in the 4800x160-pixel resolution. You get e-mail as well as WAP connectivity with this PDA.

Compaq iPAQ Pocket PC Packed to Perfection

It's light, quite light, at just 178.6 grams, but with a 206 MHz Intel RISC processor under its hood, the Compaq Pocket PC promises to zip through e-mails, schedules, MP3 files and digital photos. Standard Pocket PC versions of office suites are available, as also support for 4,096 colours at 12-bit (240x320 pixels).
