

MD on the Web

www.webMD.com is an all-rounder of a site. This health site covers almost every health aspect, from working out to eating right to information on diseases. Starting out with webMD's services is easy. After registering, you could create a health profile using the MyHealthRecord tool. This helps you create a comprehensive medical record on the Web. Besides, the record is necessary if you want to access tools such as To-Do's to keep track of your health schedules, Health Risk Appraisal, and Immunization Planner.

Time to do a little stock-taking—check out your body mass index using the BMI calculator. Now is the time to call for your personal trainer using the Diet and Fitness Journal. Select the Sports and Fitness link from the Health and Fitness section on the left-hand side column. Now click on 'Health e-tools for your fitness'. This section contains tools such as calculators, interactive tools, and slideshows. Some of the calculators available are BMI (Body Mass Index) calculator, calorie counter and target heart rate calculator. The Diet and Fitness journal is for use only by members. Fill up the profile and you get a personalised nutrition plan. The journal allows you to record your exercise and diet schedules. Charts showing your progress over the days help you monitor your goals.

Charting your way with Asimba

Assuming that you've registered at Asimba, let's get your training and nutrition log in order. Click on the

Training & Nutrition Logs link under the Asimba Tools section on the left-hand

side of the page. You will have to log in for this.

Clicking on the Go to my Log link in My

Training & Nutrition Log takes you to your log calendar. Now select the Update Preferences link under the calendar to

update your preferences. Fill up the general information. If you are into strength training,

select the exercises you usually do. Click on the Done button at the bottom of the page to save the settings. Use the Preferences link to specify the number of repetitions you do while strength training. Use the tabs to select the next aspect. For example, if you want to enter your diet preferences, select the Nutrition tab.

Use the Add Food buttons to enter your food preferences. You can also remove meal

items

using the Remove Items button. Other tabs in Preferences are Fitness and

Health. Click the Go Back to the Calendar link when you are through. Clicking on the Reports tab in the main calendar gives you a report of how true you have been and how much you have gained on the fitness schedule. The Graphs tab gives you a graphical log of how you have fared.

shape, losing weight, adding muscle, proper diet, pregnancy care, etc. Online advice from experts on fitness and pregnancy-related issues is also available on this site. You can either read through the section or submit your doubts, which will be answered by experts.

To diet for

Cyberdiet (www.cyberdiet.com) is for those of you who want to lose weight or simply get into shape. Daily Food Planner allows you to enter your target calorie count for a day. It will then give you a list of meal items with their calorific values from which you can select the ones you need.

The section, Eating Right, gives you the nutrient details in each food item so you don't have problems figuring out what and how much to eat.

Signing up with Cyberdiet's health club equips you with your own nutritional profile.

Cyberdiet: planned nutrition

Here you can design your diet around your targets and chart a nutrition plan based on whether you want to lose, maintain or gain weight. It also provides exercise programmes at the beginner and intermediate levels, interactive tools, and support groups. The site even has exercise logs for various activities such as aerobics, flexibility, strength training, and workouts.

Get set, go!

So if you've got the drift, it's high time to move away from your sofa and that remote. Go ahead and discover the better, fitter person hiding inside you. With all these sites and the tools they offer you, you ought to have a good fitness routine lined up. Just get that body moving, those calories burning, and kiss your adipose deposits goodbye.
