

Versatile and highly usable

A replacement to the now out-of-production Palm IIIx, this handheld allows you to connect to your mobile phone and dial to the Internet. Overall, this is a great choice for the price: go for it if you plan to buy a handheld for keeping contacts and information and for having some fun too, but can't afford the costlier variants of the Palm handhelds.

Palm M105

SPECIFICATIONS:
8 MB RAM, 16 MHz Motorola 68328 microprocessor, 3.25-inch, 160x160 pixels monochrome LCD display with an invert backlit LCD screen, built-in IR port and serial port that allows syncing with your PC. Comes preinstalled with Palm OS 3.5

A box full of fun

Far more powerful than the Sony Playstation and the first truly connected console to hit the market, the Dreamcast comes runs a special version of Microsoft Windows CE.

For sheer gaming fun, this is a very good device, and provides for very robust build quality, a large set of game titles and an intuitive interface.

SEGA Dreamcast

SPECIFICATIONS:
128-bit PowerVR 3D graphics, built in 56 K modem
Features: Internet browsing CD-ROM, four built-in controller ports, option for memory cards that can be fitted in the game pad itself

verdict

Net-on-TV

This TV is the first of its kind that acts as a simple TV and lets you browse the Net as well. It comes with an attractive infrared, black-coloured keyboard, 110 channels and an Internet browsing box. It can display conventional Web pages with HTML text and tables, but was unable to display pages containing Flash and Shockwave.

Videocon Internet TV

SPECIFICATIONS:
56 K modem, wireless Internet keyboard
Features: Normal to Internet mode with just a press of a key

Lap it up

Considering the overall configuration, it packs a lot into one case. However, its scores in Content Creation Winston 2000 and in Business Winston 99 were not very impressive given its 1 GHz processor and 256 MB RAM configuration. Even the Quake III tests were not very impressive, but it is noteworthy that we were able to run the test at all on a laptop!

Nishubuki 1 GHz laptop

SPECIFICATIONS:
Intel 1GHz processor, 256 MB RAM, 20 GB hard disk, CD-Writer, 14.1 inch XGA screen, Trident Cyberblade i1AGP graphics card
Benchmarks:
25.3 in Content Creation Winston 2000, 28.3 in the Business Winston 99, 15.7 fps in Quake III (normal quality) and 2.6 fps at 1024x768 at 32-bit depth. Lasted 2 hours 9 minutes in ZDBench BatteryMark
