PCanywhere, a tool to remotely control a computer, A surveillance software for your PC, a Web graphics software package, an anti-virus package and other software tested

Worth a bite

A unique and extremely useful software that gives you access to only that content on the Internet which you need, by using 'Bites', parts of a Web page that are viewed on the desktop in tiny windows. The help is extremely useful and there is a comprehensive tutorial, which shows the user a video of how to operate the software.

Free Bites

SPECIFICATIONS:

Features: Can store streaming media and dynamically generated data, Bites can be password protected
File size: 2.39 MB
Download size: 1.32 MB

In the balance

A utility for those who need to maintain home finances. It provides you with various options for managing your finances under different categories, such as investments in shares/debentures, loans, insurance, fixed deposits, etc. The interface is quite neat and the installation is simple, barring the fact that your machine needs to be equipped with MS Office.

Easy life 1.0.0
