

Private eye

A surveillance software for your PC from Spectrasoft, using which you can monitor all the activities that have taken place in a particular PC and generate a key-log. The installation can be done in a couple of minutes. It can also send you a mail report. It operates in stealth mode and it's very difficult to detect whether the application is running.

E-Blaster

SPECIFICATIONS:

Features:

Runs in stealth mode, can access the keylogger anywhere on the mailbox

Better than most

It takes lesser time in cleaning and detecting than most other software. The help is pretty comprehensive and guides you through the various installation procedures and the operating features of the anti-virus. However the software consumes 3 MB of RAM. The software managed to detect and clean the top 10 most prevalent viruses in the detection.

Command Anti Virus Software

SPECIFICATIONS:

Features:

Available for Windows 9x/NT/2000

Install size: 8 MB

Benchmarks: 10 minutes
54 seconds to scan a database of more than 10,000 viruses on a 2.05 GB partition, including viruses in compressed files

verdict

Security First

An easy-to-install encryption software, it asks you to specify a location where you want to store the volume file. It then asks for a password that you would have to use when accessing the contents of the volume, though the main volume is not protected. The software creates a ghost drive where you can simply drag and drop whatever files you want protected.

CYPHERIX Cryptainer 2.0

SPECIFICATIONS:

Runs on Win 95/98 and Windows 2000 with 32 MB RAM.
