

URL ORGANISER

Bookmark Manager

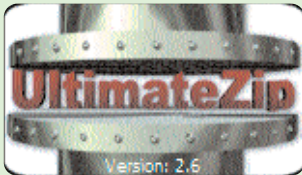

Are you a frequent surfer? If yes, then this software will be of great help to you as it maintains all your book- marks in a hierarchical tree format and also pro- vides the facility to add comments to it. The software further extends its capabilities by offer- ing you FTP support—you can easily transfer your bookmarks between your home and office computers.

ZIP TOOL
UltimateZip 2.6

Home users are more con- cerned about their hard disk space now than they were earlier. This is where UltimateZip comes in handy—it provides func- tions such as compressing multiple Zip files at one go through the batch compressor. It also features a unique feature called filemask which allows one to hide files within the archive. For example, if you want to hide compressed software, simply type **.exe** in the filemask option and the rest of the files will automatically not be displayed. You can also automatically send the com- pressed files to your e-mail client.

WEB BROWSER
Crazy Browser

Love the speed of IE but wish that it had multiple tabbed win- dows? Well, this browser gives you the best of both worlds by using the IE engine to render Web pages and display them within its multi-tabbed inter- face. It includes sup- port for P3P and has the ability to elimi- nate the annoying pop-up ads.
