Sony CPD G-420

This 19-inch flat monitor comes with Sony's proprietary Aperture Grille technology, which leads to crisper images. It has a very detailed OSD function, which is easy to use. The monitor can reach a maximum resolution of 1920x1440 (the recommended resolution is 1600x1200) and features one upstream and four downstream USB ports.

The CPD G-420 gave very good results in the Geometry test, with the lines show-

ing perfectly parallel. There was no expansion in the screen size in the Screen Regulation tests and the red, green and blue colours were reproduced precisely. The monitor, however, was not up to the mark when tested for horizontal bar resolution—it showed the bars, which were drawn very close to each other, as a single block. The ghosting effect was also very prominent. Though at Rs 52,000, it is rather expensive, its performance makes it well worth the price.
