## Viewsonic G810

This 21-inch monitor was neck and neck with Sony CPD-G520 in performance but lost the Best Performance award to the latter only on account of features supported, such as higher resolution and smaller dot pitch. The results were very impressive when displaying RGB. There were no distortions, nor was there a change in the shape of the image when the screen turned bright. This makes it a good

choice if you love watching movies. The monitor even scored well in the Horizontal Bar Resolution test. Most monitors failed in this test or displayed discrepancies such as moiré pattern.

The Viewsonic G810 has a 20-inch viewable area with a video bandwidth of 200 MHz. It is available for Rs 45,000, which makes it one of the least expensive in this category.
