Samsung NEXiO S150 ▶▶ **Stay connected**

Powered by Windows CE, this PDA features a 5-inch, reflective LCD, which supports resolutions up to 800x480, and an in-built, data-capable CDMA2000 1x module. An Intel StrongARM processor, 32 MB of ROM, and 64 MB of RAM power the NEXiO. Currently there's no CompactFlash or SD card slot, but a USB port allows you to connect your mouse, keyboard or digital camera. You can even connect to your corporate network using the wireless LAN module that transmits data at up to 11Mbps (802.11b standard).

◀◀ **Panasonic SV-SR100** **Fistful of music**

The Panasonic SV-SR100 is capable of recording high-quality music into its internal SD Memory Card (ranging from 8 MB to 512 MB) without the need for a PC! Compatible with CD-R/CD-RW disks and supporting different audio compression formats such as AAC, MP3, and WMA, this little beauty will ensure that you don't skip a beat. Plus it even has an analog input for those who still use audiocassettes.
