Samsung Office of the Future

Imagine an environment that makes work far more enjoyable and increases your efficiency at the same time! The Office of the Future was filled with next-generation multifunctional devices, TFTs that could change orientation to the kind of work you were doing, advanced lighting and computerised security systems along with state-of-the-art videoconferencing and A/V systems. Now imagine controlling all this by a single touchscreen-based interface!

Gaming and excited tech enthusiasts make a lethal combination!
