## Idex v3.1

### Cataloguing for beginners

Idex v3.1 is a basic database tool. The database can be named according to the files it contains and the utility searches it instantaneously by assigning keywords. Idex

is a convenient tool for organising and indexing image, multimedia, text and other files and accessing them fast. The utility scans the entire hard drive or the path (whichever is specified) and presents the user with the files almost instantly.

The software even has a built-in viewer to view the images in the database.

**Price:** \$30 (approximately Rs 1,470)

## Amkette Internet mouse

### As inexpensive as it gets

Name a computer component that you can buy for under Rs 400. The Amkette Internet scroll mouse retails for as low as

for a relatively inexpensive CD-writing solution.

| SPECIFICATIONS                   |       |
|----------------------------------|-------|
| 32x/10x/40x speed, IDE interface |       |
| Priya 32x CD-Writer <b>B</b>     |       |
| Performance                      | ★★★★½ |
| Build Quality                    | ★★★★½ |
| Value for Money                  | ★★★★  |
| Features                         | ★★★★  |
| OVERALL                          | ★★★★  |

Alternately, you can use the thumbnail option. You can also define the size of the thumbnails. Idex even lets you create a slide show of the images, define the time gap between the slides, add text to the slides and arrange the images in a specific order to make a simple presentation of the slide show.

The tool is best suited for those who maintain a large number of files and graphics professionals who would usually have hundreds of image files that they work upon and use regularly.

| SPECIFICATIONS                                     |       |
|----------------------------------------------------|-------|
| 26 MB install size, works on Windows 95/98/NT/2000 |       |
| Idex v3.1 <b>B+</b>                                |       |
| Performance                                        | ★★★★½ |
| Ease of use                                        | ★★★★  |
| Value for Money                                    | ★★★★½ |
| Features                                           | ★★★★  |
| OVERALL                                            | ★★★★  |

Rs 335. The mouse comes with a specific driver without which the system won't recognise it (you will find an exclamation mark in Device

Manager). It supports 700 dpi resolution and the middle button can be programmed

## Duron 1.3 GHz

### Duron Duron

The Duron 1.3 GHz is the latest from the AMD bandwagon and is built using the Morgan core. The processor performed admirably in all the tests. In 3DMark2001, the processor on an A7V266-E motherboard with 256 MB DDR SDRAM and a GeForce3 graphics card achieved a score of 5288. It logged 174.2 fps in *Quake III Arena* in normal mode and 170.6 fps in high quality mode. The reason the scores are limited in spite of such high-end hardware is the processor itself. The scores, however, were pretty decent in Content Creation Winstone 2001—67.4. It scored 49.2 in Business Winstone 2001, which makes it a great processor for office applications. Any processor with a Business Winstone score of over 40 can handle most modern office applications without a hitch.

The only point of concern with this processor was that it got noticeably hot while we ran the tests on it. This means

**Price:** Rs 7,500

**Web site:** www.amd.com

to for different functions in different applications. This mouse is best suited for point-and-click actions and is not recommended for gamers or people who tend to use their mouse for extended periods of time.

| SPECIFICATIONS                                  |       |
|-------------------------------------------------|-------|
| Scroll mouse with two buttons, serial interface |       |
| Amkette Internet Mouse <b>B+</b>                |       |
| Performance                                     | ★★★★  |
| Build Quality                                   | ★★★★½ |
| Value for Money                                 | ★★★★  |
| Features                                        | ★★★★  |
| OVERALL                                         | ★★★★½ |

the user will have to invest in a decent heatsink.

There are now several motherboards available in the market for the Duron. A VIA KT133A chipset board when clubbed with SDRAM will give you decent performance at an affordable price, whereas a DDR SDRAM chipset like the KT266 offers high performance which will suffice the needs of home and office users. The Duron 1.3 GHz is a good bet for those who don't want to loose out too much on performance, but are reluctant to let go of the purse strings.

| SPECIFICATIONS                                                                                            |      |
|-----------------------------------------------------------------------------------------------------------|------|
| Morgan core, 128 KB L1 cache and 64 KB L2 Cache, 0.18-micron fabrication process, 1.75V power consumption |      |
| Duron 1.3 GHz <b>A-</b>                                                                                   |      |
