

Publisher's Note

Maulik Jasubhai

We believe in technology. That it is the digital manifestation of the human spirit. This is THE fundamental philosophy behind all that we at Jasubhai Digital Media do. And Digit is our soul.

We believe that the true power of technology is unleashed when it is in the hands of its users. Technology is not and should not be the domain of a few firms or individuals. This dictum has often made us lock horns with many of our most valued clients. And yet it has only further strengthened our resolve to 'protect' and enhance the power of its users. It is and will continue to be our stated and explicit direction to evaluate, analyse, criticise and praise technology to better the user's life. Further, in a country like India where more than 50 per cent of the population lives in villages, it is our promise to take technology to the people. Today Digit reaches more than 300 towns and cities across the country.

Design does matter!

As information becomes ubiquitous it is only the visual and the auditory signals that will enable you to better process, store, retrieve, and yes, even enjoy information. It has been our continuing endeavour to provide you with the most 'immersive' experience. According to one of the independent studies that we conducted, to our most pleasant surprise, our readers spend almost 3 hours reading, 'viewing', and 'playing' our magazine.

We believe that the microchip is a miracle. And this microchip expands its magic beyond just the PC! Technology today is expansive and it will continue to touch, improve and enhance all facets of our lives as we continue along this path of 'evolution'. At Digit, we promise to keep you at the forefront of this evolution.
