

Mini-PC TX2 Small Factor PC ►► Size doesn't matter!

At 156x146x56 mm and 1.1 kg, you won't find too many smaller PCs that pack such punch. Aimed as a desktop replacement, the TX2 is powered by an Intel 1.3 GHz Tualatin processor, with up to 512 MB RAM, a DVD/CD-RW combo drive and a 30 GB hard drive.

Every free inch of the Mini-PC is adorned with ports, including an S-Video, two FireWire, four USB, an IrDA and a 10/100 baseT Ethernet.

Way Out Wild!

You know you want them.
Yes you do. Go on, admit it!

Bose MediaMates Computer Speakers ►► Sing away those blues

With these cool blue speakers, Bose brings its trademark sense of design and engineering to a new arena—the PC. The lack of a dedicated subwoofer is not apparent as the MediaMates use a proprietary 2.5-inch full-range driver, producing full bass and clean highs. The patented spaciousness-enhancing circuitry provides an audio experience that seems to come from a sound-stage wider than the two speakers. And for those who tend to multitask, the speakers' dual inputs allow you to use another source, such as an MP3 player, even while the speakers are connected to your computer!
