

Samsung ML-1210 laser printer

Print baby, print

The Samsung ML-1210 offers speedy printing at an affordable price. The printer supports a maximum resolution of 600 dpi, has a USB as well as parallel interface and comes with 8 MB of onboard memory. The paper-in tray can hold 150 sheets of paper. The printer also supports manual paper feed.

The build quality of the toner flap, the paper-in and the paper-out tray is quite impressive. As far as performance goes, this printer took

just 26.73 seconds for the image print test. However, it took a slow 280 seconds to print 50 pages of the test word document. It logged some good results in our print quality tests, especially when printing text and was able to print even small sized text with clarity. All in all, this printer is a good choice if you need a value solution.

DeDupe 1.0 duplicate file finder

Copy cat

DeDupe 1.0 is designed to search and eliminate duplicate files that clutter up your hard drive. DeDupe provides enough safeguards against losing files in the process of eliminating duplicate files and by default protects the system files and folders.

DeDupe can also carry out an automated process of finding duplicate files based on scheduled tasks. It also checks for duplicates in multiple drives (removable and network

drives). However, each time you need to look for duplicate files or change your preferences, you have to save them with a different file name.

Though a feature-rich application, it's expensive if you consider similar freeware utilities available on the Net.
