KNOW YOUR CD

PLAYWARE\ARENA\EXTRAS

This section brings you a selection of new levels, upgrades, patches, add-ons, maps and other stuff to make your gaming experience better. This month we have patches for *Chaser*, *WarCraft III: The Frozen Throne* and *Humvee Assault*.

The *Chaser* patch upgrades the game

to v1.47 and fixes problems pertaining to sound, anti-cheat and server memory allocation. The *WarCraft* patch fixes some map crashes while the *Humvee Assault* patch addresses problems such as random crashes and

slow loading times.

MUST TRY SOFTWARE

The Hulk

In this 3D action fighter you fight a stream of soldiers in a gas station and

then face off a tank. The Hulk's various punches and shooting moves work in combination with directional movements and each other, so a controller works better than the keyboard.

WindowBlinds

WindowBlinds is a desktop enhancement software. It changes the look of windows completely. After installing the program, you will have a fully skinnable user interface. You can change many things such as the style of the title bars, buttons, tool-bars, etc. The current version uses a

Microsoft certified way of extending Windows XP to support additional 'visual styles'. Apart from cosmetic effects, it also adds skins on the title bars of windows, MP3 players etc. The software also provides customised control over the double-click, and the right-click actions on the title bar, and many other enhancements.
