

# Sound Advice

**Maudlin about a number, and wish it never fades? Well, here's how you can sustain that oldie, and keep those sentiments alive...**

Everyone has a favourite number, that sentimental oldie, which brings back sweet memories dear to you. Unfortunately, getting to play that song may involve a lot of effort—rummaging through old cassettes, or flipping through a dusty stack of records, reading them, label by label. Once that's done, and you find the song you're looking for,

you'll realise that the deck you've not used for years has a dirty head, or needs re-alignment, or maybe your record player has a broken belt. Ouch!

Got all that sorted out? Great! Now, the song that you remember so clearly in your head doesn't seem that clear to your ear. Dusty old tapes, having to repair your deck, the perpetual hissing sound—all

this is a bit too much for our ears that are accustomed to CD-quality audio, and our click-to-play minds. Abort! Abort!

## Plan B?

It seems that the easiest thing to do would be to just download the song from the Internet. So, you fire up your file-sharing applications, and run a search—without much success. Next, you query your favourite search engine, and run through all the MP3 sites you've bookmarked—all in the hope that they may have your number. By now, you are wondering why is this so difficult—after all, it took just a few minutes to get that Enrique song the other day.

The problem is that you're more likely to find yet-to-be released songs by Madonna, than something Status Quo sang 15 years back. Defeated and dejected, you now consider (...gasp!) buying the CD. Seems logical enough, but just like the Internet, chances are that it will be

**Find it on the Mindware CD**
