Fujitsu Stylistic ST4110 Tablet PC

A tablet for your office worries

The Stylistic ST4110 is a true tablet, unlike the notebook convertibles we tested earlier. One of the lightest tablets around, the ST4110 weighs a little less than 1.5 Kgs, and measures 301.3 x 220 x 20.9 mm—just about the size of an A4 sheet. The suede backing at the rear ensures it does not slip from your hands while you're moving around.

Input is as simple as writing on paper, with the full-sized stylus. However, all ports, apart from the external monitor port, are exposed, which can be bad because of dust and humidity.

The optional docking station includes a CD-RW and DVD combo drive. It also adds additional USB ports as well as network and Firewire ports.

On the performance front: the ST4110 can handle all standard office applications. Handwriting recognition is fairly accurate. The

MobileMark 2002 battery test logged a battery life of a whopping 4 hours and 12 minutes. However, both MobileMark 2002 Performance Test and *Quake III Arena* simply refused to run on the device. Also, it does get warm with extended use, but the suede covering at the rear makes life easier.

The Fujitsu ST4110 promises to be a workhorse for the true mobile professional, however, at

Rs 1.95 lakhs for just the tablet, it does not compare very well with the Acer TravelMate C100, which is about Rs 40,000 cheaper.

SPECIFICATIONS

800 MHz ultra low voltage mobile Intel Pentium III processor, 256 MB SDRAM, 10.4-inch LCD display, 40 GB hard drive, Intel 830M integrated graphics, SigmaTel STAC9767 audio, two USB ports, Ethernet (RJ-45), modem (RJ-11), IEEE 1394 (Firewire), Infrared, 802.11b Wi-Fi compliant module, six launch keys, scroll keys, built-in microphone and speakers, Type I/II PCMCIA slot

ACi Centrino Notebook

Long lasting performance

The ACi Centrino is powered by an Intel 1.5 GHz silicon square complimented by 512 MB of DDR SDRAM, and provides enough juice for your heavy applications. A 15 inch TFT display provides a brilliant, sharp display which is hooked internally to an ATI Radeon 9000 Mobility graphics card. The laptop offers better performance in the graphics department as compared to other laptops that make do with a SiS integrated display. In the graphics benchmark using *Quake III Arena*, the mobility Radeon delivered 107 frames in normal mode, but the frame rate dropped to 73.3 frames at 1024 x 768 x 32 bits.

Where other laptops are bundled with lower rpm drives, this laptop, with a 5400 rpm, delivers a decent work-around in the performance department. This notebook offers seemingly unlimited options when it comes to networking, and the two network icons in the system tray are just proof of the forward

thinking that ACi has put into making this laptop—it offers you both wired and wireless LAN capability. When we tested the wireless LAN, the connection was up and running in just a few seconds. However, the connection kept dropping even in a good test environment.

The battery life, when tested with reader workload—where the system is not stressed—came to four and half hours, which is nearly 2 hours more than a regular laptop. The claimed figure, however, is seven hours, which might be possible to get if you lower the brightness; but this strains the eyes.

Overall, priced at Rs 1,15,000, it offers features which more than justify the price, and is a good buy if you want a performance-rich laptop with Centrino technology as the icing on the cake.

SPECIFICATIONS

1.5 GHz Pentium M processor, 512 MB DDR memory, 15-inch TFT LCD, ATI Radeon 9000 mobility graphics card, 5400 rpm hard disk and built-in wireless connectivity
