

Date	Description	Transfer	Income
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00

This is what your salary entries will look like, from the the start of the financial year

Begin by entering the date you received your salary cheque, then a small description to summarise the salary transaction (writing the cheque number in the description is a good idea). Then, in the Transfer column select 'Assets:Current Assets: Savings Account', and finally, in the Income column, type the salary amount. An example entry is as follows:

Description: Salary for the month of September
Transfer: Assets: Current

Assets: Savings Account
Income: 1000.00

The financial year starts from April, so you will need to feed in all the entries from April, to the current date.

Once your income group is updated, you need to work on the expense group. For example, an important account in Expense that needs to be mentioned is transportation cost. For this, you can use the Public Transportation found within

the Expense group, and double-click on the entry to open it. Here you will find a column similar to that in the Salary account.

If you use your own vehicle to commute, you can use the 'Fuel refill' category, which will also be mentioned in the Public Transportation account. Whenever you make any entry within the Public Transportation account, most of the entries will have the Transfer column value as 'Assets:Current Assets:Cash in Wallet'.

Your salary goes directly to your savings account, while your transportation and other expenses are cash transactions. So you'll have to make entries in the system to reflect a cash withdrawal transaction. The entry will transfer a certain amount of funds from the savings account to the 'Cash in Wallet' account. For such entries, the Transfer column will contain 'Assets:Current Assets:Savings Account' with the 'receive' column containing an

Date	Description	Transfer	Receive
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00
5/10/21	Salary for the month of September	Assets: Current Assets: Savings Account	1000.00

Entries Transferring Funds from Bank Account to Cash-in-Wallet

amount, say Rs 100.00. An example entry:

Description: Monthly Expenses

Transfer: Assets: Current

Assets: Savings Account

Receive: 100.00

All other expense transactions can be created in the same way. You may need to update different expense accounts such as rent, property tax and so on. Another type of entry that involves transactions in three accounts, is credit card transactions. To replicate this scenario in the software system, first double-click on Clothes within Expenses, then create a new transaction
