Samsung SGH-V200C

Twist, smile, click!

The SGH-V200C gives you a 180 degree rotating camera; and lets you flip and zoom images right while taking pictures. Apart from being Tri-band, MMS and GPRS enabled, it is also sleek and stylish, with a crisp, vibrant 16-bit display. However, the external antenna does get in the way.

Menu operations in this model are far simpler as compared to the earlier R220. The easy to use four-way scroll key allows you to hop directly to predefined menus. You can save upto 500 names, and it also has an extra 32K SIM capacity for 250 names with 16 MB of internal memory, it allows you to store a

sizeable number of images, ring tones and messages. The device also comes with an extra set of batteries.

The phone has an Infra-red port, but for some reason it failed to receive any sort of data in our tests. Even though it is MMS enabled, you can't add audio to your messages, and the T9 dictionary does not allow you to save custom names.

Overall, this is a nice phone, but does not justify the price tag of Rs 29,999.

SPECIFICATIONS

16-bit display, 355 x 288 camera resolution, 500 entry address book, 16 MB inbuilt memory, GPRS and Tri-band enabled, MMS capability and two sets of Li-ion batteries

Tech-Com Pen Tablet

Digital canvas

A Pen-Tablet is the perfect solution for creating art on your computer. It replaces the traditional mouse with a flexible pen, giving you a more natural way to draw, trace, scribble

and design.

The installation process is a lot harder than it seems.

After connecting the USB cable connector to the USB port of your computer, you need to refer to the quick installation guide. The pen

has a two-way button for right and double-clicking functions, and its tip can be used to left-click. The Pen uses electromagnetic technology to sense the movement on the tablet that is relatively well mapped to your monitor screen.

The tablet is too sensitive and the mouse cursor tends to move too fast. It will take a

little while to get accustomed to it.

SPECIFICATIONS

Package contents: Tablet with 6 x 4-inches working area, Stylus pen, pen holder, USB connector, drivers and manual on Installation CD, Art Dabber CD

Pushpam HandsPC 1600

Touch me not

The HandsPC 1600 has an elegant silver body and chrome-finished buttons. It looks quite like an iPAQ, and at first glance, it's hard to distinguish it as a locally made product.

The 1600 comes with a bright white backlight, which is not crisp or sharp enough for reading. The touch screen also lacks accuracy, but the handwriting recognition is excellent. The user interface is similar to that of the Palm OS.

This PDA is packed with

an MP3 player, a Dictaphone and powerful PIM functionality. The bundled software that is customised for Indian professionals—one for accountants, and the other for LIC agents.

The 1600 is priced at Rs 19,200, which is a little steep.

SPECIFICATIONS

33 MHz Motorola Dragon Ball processor, Penbex OS, 2-inch 12-bit colour display, IR port, 64 MB Compact Flash, serial connection
