software required for all its tasks comes bundled.

The printer resolution is 1200 x 1200 on plain paper, and 4800 x 1200 on photo quality paper. It took just 18 seconds for a full sized text test page in normal mode. The photo-quality test prints were comparable to the best in the low-end printer class.

The flat-bed scanner can scan A4 size paper at a maximum opti-

cal resolution of 600 x 2400 dpi and 36-bit colour depth. Twenty seconds for a text document was what the scanner took, and the quality of the scan was acceptable. The results were disappointing for high quality photo. The OCR software gives a minimum of errors. A press of a button copies a document.

The HP PSC 1210 is the ideal device for home use where you print and scan occasionally. We don't recommend it for colour copies and scans, however. But finally, at just Rs 7,999, it is the best
