Are you a tech Savvy family?

Win NVIDIA multimedia goodies by participating in the Digit NVIDIA India's most tech savvy family competition at www.thinkdigit.com/envy

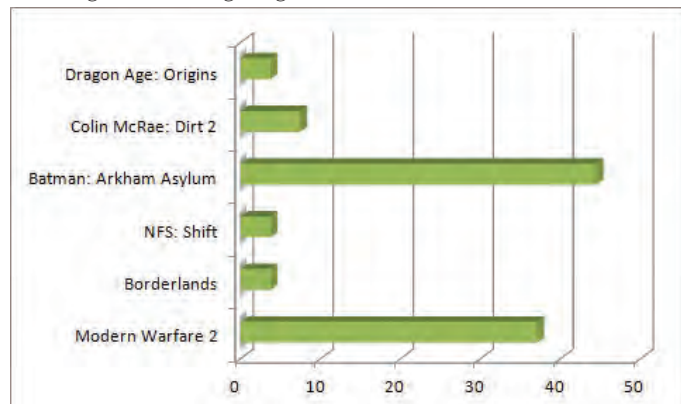

[Poll] Game of the Year 2009

NVIDIAGeek: Yo! Just like Ethan's yesteryear post, vote for the best game of this year & it's strictly PC. If there are any games - that you think is great - other than the 10 ('cause only 10 polls are allowed), please post in this thread. So, let the votin' begin!

Krow: Good to see no Ezio, Nomad or any other similarly sad reference in your post OP. Please keep this up. Voted for Arkham. I know Vamsi will give it to Dragon Age.

NVIDIAGeek: Thank ye. I'll do that only for "Game You are Currently Addicted to" thread. Outside that thread, I'm a serious guy.

vamsi_krishna: absolutely not. I didn't even beat the game yet.. how can i rate it??? Even if I would have completed the game, My vote definitely goes to Batman. Sure Dragon Age origins is rocking but I might be cheating the gamer inside me if I vote for it.

[Poll] Indie Game of the Year 2009

Anorion: Thought I'd get this going as well, just wanted to know. I hope I haven't left out anything.

kanjar: World of Goo

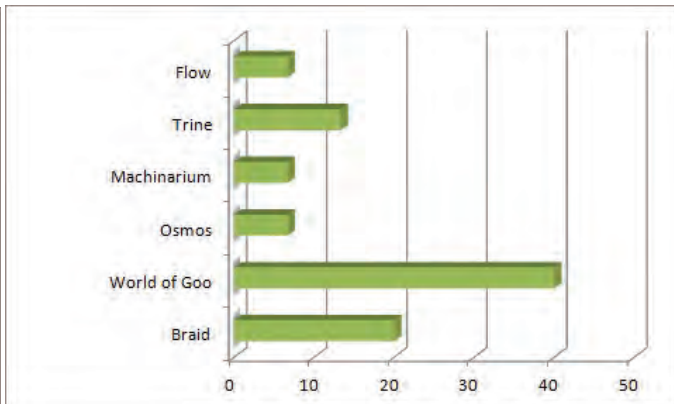

NVIDIAGeek: Machinarium for me. It's too great.

Ei8t: Trine for me.... even Braid was good... but multiple characters of Trine made me vote it....

Davidboon: It's World of Goo for me, simply addictive.

chavo: Braid is amazing. After that Trine

confused: Yes u left out: "And Yet It Moves"

December 2009

digit events

Digit is taking interactivity to a new level, and will be organising events every month. You get to meet and interact with people that you wouldn't in the normal course of your life — industry experts, Team Digit, and other readers with similar interests. Stay updated and stay ahead of the curve by looking for this page in every month's magazine.

1 Career Webinar

Network Security

**JANUARY 10
TIME: 1500 HRS**

Over the last few years, as the use of networks has grown multiple times, many institutions, organisations have installed these network systems without realising the risks they run. This webinar will cover some of those risks and their possible solutions. Join Gaurav Aggarwal, Software Engineer in Citrix R&D India, who is involved in the development of SSL-VPN based gateway, to discuss aspects of Network Security, its principles and career prospects. If you are looking for a serious career in Network Security, this webinar is just for you. The webinar will also have a question and answer session towards the end, to sort out any doubts or queries that you might have. A transcript will be available at the end of the webinar to all attendees.

2 Digit Webinar

Securing your PC

**JANUARY 10
TIME: 1700 HRS**

Since January is our security special, we'll be going over the various means by which you can secure your PC. From basics like choosing an anti virus solution to installing a firewall. You'll get to learn safe computing hacks like disable filesharing, which windows services to turn off, hosts file tweaking and the fundamentals of passwords. Clear all your doubts about running programs risky applications in a virtual machine, rootkit checkers, limited user accounts, phishing mails and everything under the security umbrella.
