

Time travel

The 'Back to the Future' series of movies by Steven Spielberg featured a car with the powers of time travel

The Skyler looks great but is yet to prove its mettle Skymaster and a Ford Pinto. This one, however, was a car that you drove to the airport and could be bolted into the aircraft before flying away. Besides, the project collapsed with the death of Henry Smolinski when the Mizar disintegrated mid-air during a test flight. Though none of those mentioned below resemble 'The Fifth Element' kind of flying cars, they do come pretty close.

Terrafugia's transition

The most significant effort in the creation of a 'Flying Car' is by a company called 'Terrafugia' set up by MIT graduates in Massachusetts in 2006. But this one is a 'Roadable Aircraft' called 'Transition'. The Transition is so designed to fold its wings when not flying and to be used as a legal 'car' – or a 'street-legal airplane', as they state in their web site <http://www.terraflugia.com/>. There are no bolts and nothing to put together or dismantle but you'd need to be a driver as well as a pilot to be able to use one of these. Terrafugia hopes to launch its first commercial model in 2011 and has already received 70 orders as of September 2009. This one will be a two-seater, which can travel 725 km at a speed of about 115 km/hr in air.

Moller International's Skycar

Paul Moller's invention is the 'Skycar' – a personal Vertical Take Off and Landing

With the Transition you could drive to an airstrip and then fly to work

Patents

There are nearly 80 patents filed at the USPTO for flying cars. Most of these have never really taken off

(VTOL) 4-seat aircraft which, uses four pairs of Wankel Rotary engines, and, it is claimed, can hover 15 feet above the ground. It has four ducted fans with covered propellers to increase safety. Although it is, quite evidently, a small aircraft, it is projected as a 'car' since it has the potential to be used to commute over short-distances. This 'flying car' has been several decades in the making and Moller has had to postpone projections of its launch more than twice. The present craft under production is the M400 which is planned in single as well as 6-seat versions.

Labiche's FSC-1

Mitch Labiche's Labiche Aerospace has designed the FSC-1 which is basically a car that can open out into an aeroplane with the push of a button, or conversely, an aeroplane that can fold up to become a car. When it comes to flying cars, people

Parajet skycar

would prefer something that is more of a car and less of a plane – a conclusion Labiche reached after asking about 3000 people. So, unlike the Moller M400, this can actually be driven on roads.

Skybike

Samson Motorworks' Skybike is a three-wheeled motorcycle that can be flown or driven on the streets with equal efficiency. Led by Sam Bousfield, an inventor with several patents to his name, this Sacramento-based company hopes to launch a radio-controlled model of its attractively

AMKETTE

Now Play
Hard Disks, Flash Drives
or Memory Cards on
your TV

AMKETTE

FLASHtv
my world, my way

Amkette FLASH TV is an ultra-compact multimedia player that allows you to connect the digital storage you own; USB Hard Disk drive (NTFS or FAT32), Flash drives, Memory cards (SD, MMC) to your TV to let you enjoy movie, music and photos.

Features

- Ultra Compact:** Portable and easy to travel with.
- 720P HD Output:** High Resolution Video Output.
- Play Portable Hard Disks:** Plays NTFS and FAT systems.
- Photo slide show with background music:** Easily connect your Memory Card and start a slide show.
- Data transfer from Memory Card to USB drive:** Transfer data between devices without the need of a PC.
- High Frequency Adapter:** Adapter has a range from 100V to 240V for extra voltage protection.
- Supports up to 7 USB drives:** Attach a USB Hub and connect up to 7 USB drives simultaneously.

Amkette Flash TV is available at all leading stores across India and is supported by one year carry-in warranty. For more information call nearest Amkette Branch offices :- Delhi: 011- 26389876/7, Ahmedabad: 079-26854188, Bangalore: 080-25591315, Chennai: 044-28554619, Cochin: 0484-3229001, Hyderabad: 040-27892865, Indore: 9303019633, Kolkata: 033-32509446, Lucknow: 0522-4012389, Mumbai: 022-26873370, Orissa: 9338114276, Patna: 9308328231, Rajasthan: 9314419151

Also available at: Croma, E-zone, Hypercity, Landmark, More Hyper store, Jumbo Electronics.
