

Laser Printer emissions

According to a study by the Queensland University of Technology, laser printers can emit clouds of ultra-fine particles that compare to cigarette smoke and motor vehicle emissions

same banding was present even with these range of printers. The Ricoh SP4100NL for example had a lot of this. This printer is also a perfect example of something else – ridiculously fast printing speeds.

We were impressed to see it print in 5.8 seconds. A 15-copy print order took just 38 seconds! This is the fastest of all the printers in this test. The cheaper SP3300DN model and Brother's HLS240 aren't too far behind either. If you want speed, then you're only going to find it in the monochrome laser category over Rs. 10,000. Quality of prints is almost identical – to the naked eye, that is.

Color laser printers

As this category usually caters to office users who print bulk documents with both text and images, it's priced higher. There are savings to be had in the long run though.

Canon Laser Shot LBP7200Cdn

At 24 kgs, this is the heaviest printer we tested this month. It has a matte finish body, and sports indicators that prompt you to load paper or check for paper jamming. There

are lights to indicate status of the CMYK cartridges. All four cartridges are placed in a single compartment, with instructions on how to install the cartridges clearly visible.

Installing drivers is not a straightforward affair. We selected USB, and then had to switch off the power, reconnect the USB cable and then power the printer back on before the PC recognised the printer and started installing drivers.

The printer takes a long time to warm up for individual prints, but is a lot faster with bulk prints.

The duplex printing option is impressive, and outputs are quick. This is because printer pulls the next page in while the second side of the first one is still printing.

Canon Laser Shot LBP7750Cdn

The LBP7750Cdn is a really huge printer and one that's designed for large offices.

The body design is great and use of metal in many areas of the printer makes it sturdy. The hinges aren't extremely sturdy, though, and are slightly loose. It's heavy, and requires two people to carry it around.

Canon Laser Shot LBP7750Cdn

INKJET PRINTERS FOR OFFICES

BRAND	Canon	Epson
Model	PIXMA iX5000	B-500DN
Price	Rs. 18,995	Rs. 22,999
Grand total (out of 100)	48.88	72.66
Features (out of 30)	9.62	15.48
Performance (out of 70)	39.26	57.18
