

Bucket Printer?

The bucket shaped Canon Selphy CP790 is a cute compact photo printer screen which gives out water resistant photographs.

Canon PIXMA iX5000

It features network connectivity, which adds to its versatility.

The B-500DN is quite noisy, but quick, and is great for photo printing on glossy paper. Printing quality of documents with lots of text and graphics is also excellent, but colours could have been better.

Check out all the printer photos at www.thinkdigit.com/d/1001printers

Performance

It was a one-on-one in the case of the Epson B-500DN and the Canon PIXMA iX5000. The Canon had really impressive colours and quality, but was slower. In most office scenarios, where quality isn't as important as speed, the Epson would steamroll the Canon.

The Canon's prints were a little over-saturated, but not as much as the Epson. Blues were too prominent in photos, but a little colour adjustment could fix this.

The laser printers from Canon didn't stand much of a chance against their mighty inkjet comrade – the iX5000 when colour saturation and photo quality was compared. If you are in some kind of a studio and need excellent photo quality, inkjets such as the iX5000 are the best solution.

If you're looking for speed and cheap prints, lasers like the Canon Laser Shot LBP7750Cdn and LBP7200Cdn are your best options – they aren't cheap though. There is a big difference in both perform-

ance and features. The LBP7750 throws out a photo print every 17 seconds. To give you some idea of how fast this is, the iX5000 takes more than two minutes!

Conclusion

Starting with the most impressive performer of the entire test, the Canon Laser Shot LBP7750Cdn. It happens to be the most

expensive one of the lot, and also has the best features. For a colour printer, it's really fast and the photo test was exceptionally quick – 17 seconds for a A4 sized photo print. Sure, the quality of the photo print is not as good as the iX5000, but it's equally matched everywhere else.

The Epson was the next best, mainly

because of its feature set. For a colour inkjet, it's really fast as well. We weren't

very impressed by the slightly darker colours in the photo prints but the detail was good. It makes good sense when you consider the price tag – Rs. 22,999. It gets our Best Buy award.

Of all the mono laser printers, we recommend the Canon Laser Shot LBP3300B. At just under Rs. 10,000, it's perfect for most small businesses with some 10 to 15

Canon PIXMA iP1980

employees. It might be the most expensive of the Under Rs. 10,000 segment, but it's a worthy winner.

If you're like most of us and just want a simple printer for simple everyday use, the Canon iP1980 is the most sensible choice. Even though it isn't as good as the iP3680, it's a lot cheaper at Rs. 2,695. ■
