SSD				
BRAND	Kingston	Intel	Kingston	Kingston
Model Name	SSD Now 64 GB V+Series	SSD 80	SSD Now 128 GB V Series	SSD Now M Series
Model Number	SNV225-S2/64GB	SSDSA2SH080G1GN	SNV125-S2/128GB	SNM125-S2/80GB
Price (Rs)	8999	14000	15555	17500
Grand Totals (Out of 100)	78.08	75.42	53.53	69.17
Features (Out of 5)	5.00	0.00	5.00	0.00
Performance (Out of 95)	73.08	75.42	48.53	69.17
Cost Per GB (Rupees)	150.9	187.8	130.5	234.8
FEATURES				
HDD formatted capacity (GB)	59.63	74.53	119.24	74.53
Interface	SATA 2.0	SATA 2.0	SATA 2.0	SATA 2.0
Buffer Size (MB)	128	16	64	16
Trim Support	Y	N	Y	N
PERFORMANCE				
Synthetic Tests				
HD Tach 3.0.1.0 (8 MB file)				
Average Read (MBps)	187.4	219.4	111.2	189.5
Average Write (MBps)	140.2	73.7	79.2	61.2
CPU Utilisation (%)	3	4	2	2
Random Access Time (ms)	0.3	0.1	0.2	0.2
Read Burst Speed (MBps)	251.6	256.2	125	207.1
HD Tach 3.0.1.0 (32 MB file)				
Average Read (MBps)	176.9	215.6	111.2	148.9
Average Write (MBps)	106.7	78	85.8	64.7
CPU Utilisation (%)	3	4	2	3
Random Access Time (ms)	0.1	0.1	0.2	0.1
Read Burst Speed (MBps)	250.9	256.8	124.8	209.3
SiSoft Sandra 2010				
Drive Index, Read (MBps)	211.35	241.54	117.72	202.24
Access Time, read (ms)	0.24	0.08	0.04	0.12
Drive Index, Write (MBps)	85.27	76.27	58.6	54
Access time, write (ms)	0.17	0.01	21.1	0.01
Real World Tests				
File Write 8 GB Single File (MBps)	142.72	72.37	82.08	68.44
File Write Test Assorted 8 GB File (MBps)	73.01	68.15	46.52	53.82
Read Test Single 8 GB File (MBps)	195.51	217.29	98.34	199.32
Read Test Assorted 8 GB File (MBps)	165.49	180.04	100.64	156.34
Intra Drive Test (Read/Write) Sequential (MBps)	53.09	53.61	45.77	50.54
Intra Drive Test (Read/Write) Assorted (MBps)	43.81	50.95	27.05	47.63
PhotoShop CS2 (1 GB File, in seconds, less is better)	52.80	31.80	72.70	28.60

need a board with an SAS controller, which is something of a rarity, but hardly impossible to acquire. Western Digital's Green Edition drives run cool, but their performance isn't too hot either. These are not intended for performance junkies, but those needing storage. Seagate's Barracuda LP ST32000542AS was better in terms of performance, and nearly embarrasses its supposedly faster sibling, the Barracuda 7200.11 1.5 TB ST31500341AS, surprisingly so, considering this is a 5,900

rpm drive and the latter is a 7,200 rpm one. This is an unusual speed, for most drives are either 5,400 rpm or 7,200 rpm ones, but whatever the change, it's evidently working for Seagate. The LP stands for Low Power, meaning it's aimed at WD's Green series of drives.

With the Cheetah 15K.7 ST3600057SS strutting its stuff in the performance charts we were pretty clear who our performance pick would be. But it's not a desktop drive, at least not one that you can just go out and buy and plonk it in and get started. For one, SAS controllers are found on hardly 2-3 motherboards at the
