D-Link DIR 685

Costliest home router ever?

The D-Link DIR 685 Router is a high-end feature-rich router. Its body with a smooth finish and a 3.2-inch LCD screen makes it one of the better looking routers in the market.

It comes with two USB ports for external storage devices and it also has a slot to attach a 2.5-inch SATA hard drive (up to 500 GB) on the rear side. It can

tons have a definite delay in the response time. The LCD is crisp and it displays information such as internet speeds. The router provides unique features such as FTP server and file sharing on the network. There's even Bittorrent downloading capabilities.

Check out the performance figures of the D-Link DIR 685 on www.thinkdigit.com/d/1001_dlink685

also be used as a photo frame although we would like a larger screen. The router is easy to set up, although it takes a long time to start up. The touch screen but-

The router was tested for wireless performance in three zones. It runs quite smoothly with the wireless connection in the same

room but the signal quickly weakens in the adjoining room and so does the performance. For all the grand features provided by the router, there is a grander price to pay. At Rs. 21,000, it's one of the most expensive routers we've tested.

Samsung ST550

A path breaking dual-screen compact camera

The Samsung ST550 is the first ever compact camera to have a 1.5 inch display screen embedded in the front panel, thus allowing easy capture of self-portraits.

The design is very simple with only three buttons and a zoom notch. The touch screen works well. The wide touch screen enables ease of control, but navigation will definitely take some time.

The photographs are quite rich and even at ISO 1600, the noise effect is not that prominent. The camera lacks a viewfinder. The preview button just below the zoom notch also allows the user to make on-the-spot image editing which is an innovative feature.

The face detection feature of ST550 is quite impressive. For a compact camera, it has various options to focus a subject. The Smart Touch AF and One touch shooting modes provide the user enough freedom to choose any focus point within a frame.

Priced at Rs. 24,990, it's expensive for a compact camera in spite of the many features.

Specifications

12.2 MP, 4.6x Optical Zoom
