

UE4 development

EPIC says Unreal Engine 4 is in development but is still a long way off

One controller

To rule them all. Sony has filed a patent that aims to make this console dream a reality

At the time of going to print the CTC discussion thread had 14,622 views and 1,123 posts! Thank you everyone for making it such a success. We know you enjoyed it. So did we...

Re: Preview + Feedback [February 2010]
Waiting for today's ctc clues
I refreshed the clue page almost 100 times from 12 AM waiting for the clue page to load.
Mod wants to tease us 😊
Keep waiting guys clues can be up any second.

Re: From the Editor's Desk
I actually called in sick today for work to get my next clue.

I second the feeling. Never before has digit occupied so much mindspace for so long a time.
🤔🤔🤔🤔🤔🤔
learnt so much doing this that I have started to go over all the clues again to read up on them.

CRACK
THE CODE

digit

Crack The Code
Contest

All of last month, readers from all over the country were relentlessly being led through a world of puzzles, clues and nerve wracking code breaking. Some made it, some merely survived while a select few actually kept us on our toes to think up better, tougher and harder clues.

From simple things like looking into the source code of a web page for clues, to fixing .exe files in a hex editor, contestants had the ride of their life going from one clue to the next. Some stayed up into the wee hours in anticipation of a clue, others missed their work being engrossed in code breaking, while still others ran from pillar to post looking for hints from forum members. Watch this space next month for our final announcement. Who gets the ultimate bragging rights and, of course, prizes worth Rs. 10,000 which were up for grabs?
