

120 MP sensor

Canon recently unveiled a 120 MP DSLR sensor

LinuxShark

15 year old Digit reader Arit Chaudhary has come up with his own Linux Distro. Find it on the Playware DVD

Community

Become a certified ethical hacker

Thanks to the popular portrayal of hackers as young immoral computer experts associated with nearly any possible illegal and immoral activity that can be conducted through a computer, we see hackers are outlaws of cyberspace, out to steal passwords, or get access to your bank account and steal money.

In reality, however, a hacker is someone who is curious about the working of computers and software. Often, instead of simply accepting things the way they are, they will look for ways to make things work the way they want. Hacking has been

so misrepresented in the mass media that people have had to coin another term "ethical hacking" just to be clear.

With the sudden boom in Information Security, hot jobs with lucrative pay packets are opening up. According to NASSCOM findings, India & USA will require at least 85,000 ethical hackers every year. Unfortunately, only 25,000 have become qualified in the past 5 years. Digit has partnered with Leo Impact, and members of the Digit Community would get an exclusive discount of Rs. 2000 on the course. Visit www.thinkdigit.com/ceh for more info.

To quench your irresistible desire to learn ethical hacking, we recommend the Fast Track to Ethical Hacking from the June 2010 issue

SentinelHASP™ STOP PIRACY & ILLEGAL DISTRIBUTION OF YOUR SOFTWARE

Are You Losing Your Revenue And Potential Customer Due To Piracy Of Your Software?

Sentinel HASP SRM Industry's First Fully-Integrated Hardware and Software-based Software Rights Management Solution

- Strong Copy Protection to combat software piracy
- Secure & Flexible software licensing and software License management
- Unmatched IP Protection to maintain your competitive edge
- Enforcement through Cross-Locking™ Technology that enables choosing either hardware-based (dongle) or software-based (product activation)
- Role-based to Fully Align with the Product Lifecycle
- Easy to use license management tools
