Outputs2 x DVI ,HDMI

Processor.....Intel Atom 1.66 GHz
Hard drive160 GB
Display size.....10.1 inch
Weight.....1.26 kg

TEST CENTRE RATINGS (All Scores out of 10)

Features.....7.0
Latest GF104 "Fermi" chip, SLI support, detachable fan makes it simpler to clean the heatsink.

Performance.....7.0
Performs at par with GTX 465 on many benchmarks, factory overclocked means no effort to get extra performance.

Build quality.....6.0
Simple plastic exterior, sturdy build, will fit in most chassis without any trouble.

Value for money.....7.0
Great value for its price when compared to similar cards.

Features.....7.0
Full copper body, two fans, all solid state capacitors, supports 3D Vision Surround technology.

Performance.....7.0
Frame rates are at par with other GTX465 cards. Operates 20 per cent cooler than other GTX465 cards we have tested.

Build quality.....7.0
The full copper body makes the card very sturdy and also very heavy at the same time.

Value for money.....7.0
At ₹14,600 we feel it is a very decently priced product.

Features.....6.5
Overclocked by 25MHz. DirectX 11 compatible. NVIDIA 3D vision ready.

Performance.....7.0
3D mark gives an overall score of 15611. No noticeable increase in performance after overclocking.

Build quality.....5.5
Quality of plastic body is cheap. Quality of fan is also mediocre. Smaller in size than other cards.

Value for money.....7.0
Decent price point. Performance could have been better.

Features.....7.0
3G USB modem supported. Backlit keyboard. Ships with a carry bag.

Performance.....6.0
Poor battery life. Under average performer on benchmarks. Poor inbuilt webcam.

Build quality.....8.0
Sleek stylish design. Ultra portable, lightweight and solid build quality.

Value for money.....7.5
Highly economical at ₹19,499. Gives a good bang for your buck!

WE SAY

7.0

Considering it is the 768 MB variant and performs very well across the board, it is an excellent option to consider when either upgrading from an older card or if assembling a brand new gaming rig. The detachable fan is an added bonus when cleaning the card but care must be taken not to run the card with the fan detached. Overall, a good value for money card with some unique features.

7.0

The MSI NGTX465 Twin Frozer II Golden Edition does not pack any extra features. It is not even overclocked. If you have not invested too much on cooling system for your PC and not using it in an AC room Twin Frozer is a product made especially for you. Also an overclocking enthusiast might be interested in this card.

Digit September 2010

6.5

Performance of this card is similar to other GTX460 cards. One of the cheaper cards around. At the same time, we would have liked better build quality. Also, Zotac's GeForce GTX460 AMP edition performs better than Palit GeForce GTX460 Sonic so you can easily skip this one.

7.0

The Acer Aspire One 532h is an ultra-portable netbook that typically suits the needs of a frequent traveller. It has a sleek and compact design. The optional 3G connectivity adds additional functionality by letting you get online wherever you are. Better battery life would have made it a much more compelling buy.
