

The following table shows the results of the test as a percentage of the total score for each category. The scores are based on the number of correct answers out of 100 possible answers.

Category	Score	Percentage
General	75	75%
Math	80	80%
Science	70	70%
History	75	75%
Language Arts	75	75%
Physical Education	75	75%
Art	75	75%
Music	75	75%
Health	75	75%
Computer	75	75%
Other	75	75%
Total	750	75%

Ability Office lost all the information that was contained in this table in one of the test documents

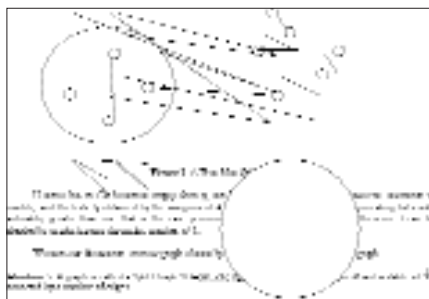

could do with a few improvements.

Corel WordPerfect 11

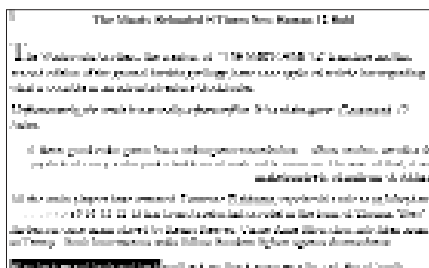

Nearly perfect

WordPerfect renders text perfectly, and you can't differentiate it from the text displayed in Word. It also fared well in the document with the complex table.

The placement of images in the document was not always perfect, and in some cases it went completely haywire - so much so that the original image could not be identified. In the document used to test callouts on images, the image itself was not displayed properly, and callouts

A common problem with WordPerfect is complete distortion of diagrams within documents

The rendering of text and formatting was near-perfect in WordPerfect

Lotus WordPro

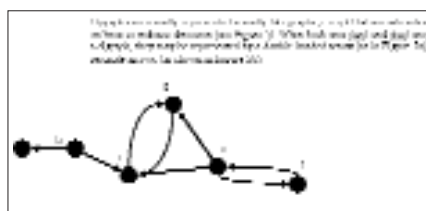

Irresponsible with images

WordPro was able to display all the graphs in the test documents. Its rendering of the pie chart was the best among the lot, but it did goof up slightly on a simple bar graph. Text formatting, formulas, HTML links and placement of footnotes was also near-perfect. While it was able to display some of the embed-

WordPerfect was able to render this complex table perfectly

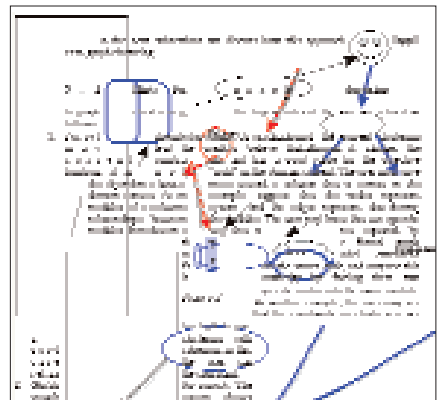

At places, the alignment of images with respect to the text was bad

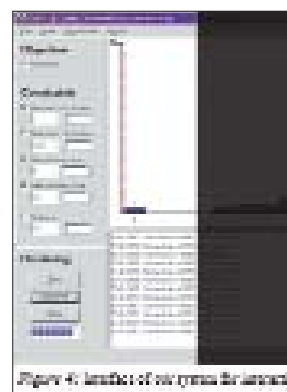

Lotus WordPro was able to perfectly reproduce graphs, including pie-charts, and it had problems with just one bar graph

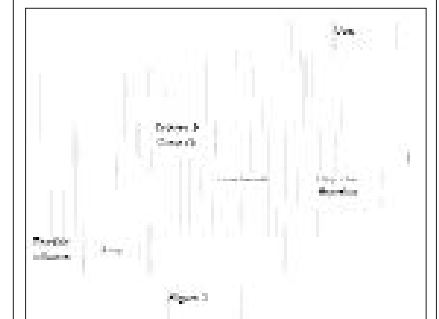

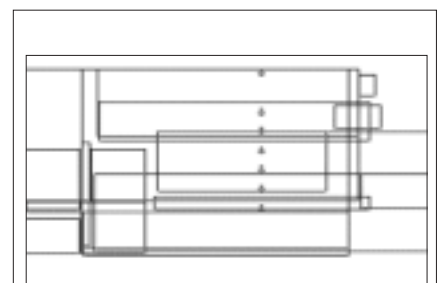

ded screenshots properly, diagrams and images caused problems. It missed out on a lot of them, and among the ones that were displayed, a couple of them were distorted beyond recognition. These were, typically, diagrams with sev-

This simple diagram was completely deformed, and displayed over the original text

The callouts were altogether absent, and WordPerfect couldn't even display the embedded screenshot completely

These simple diagrams was deformed beyond recognition
