SoniqCast Aireo ►► Peerless Wireless

Armed with a 1.5 GB micro hard drive, a 1.5 GB capable Secure Digital (SD) slot, an FM radio receiver and transmitter, the tiny Aireo supports MP3 and WMA, and also doubles up as a storage device. Unlike others in its class, this SoniqCast uses Wi-Fi connectivity to link to your playlist on your Wi-Fi enabled PC and sync with it! Now doesn't that tempt you to junk your iPod? Truly portable, get it to sit at home on your tabletop or on your car's dashboard.

Price: US\$ 300 (approx)

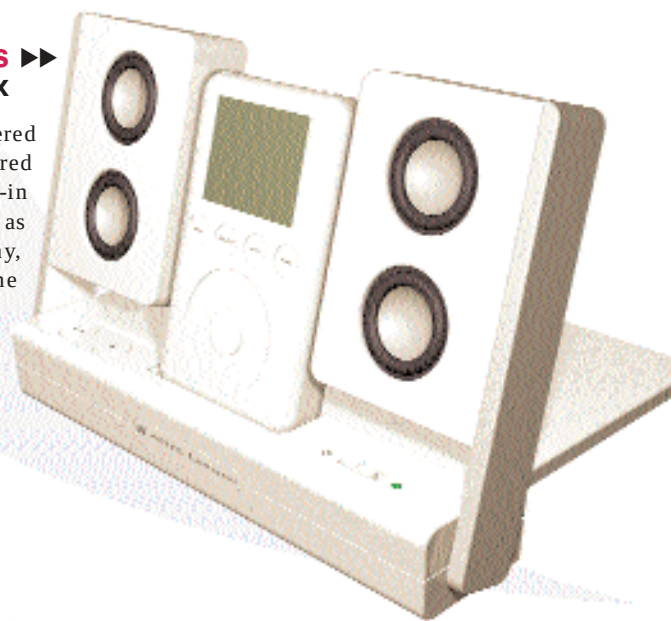

Dancing in the Street

All you road warriors out there—get set to burn down the highway with the best in portable audio and video this month

Altec Lansing InMotion iPod speakers ►► iPod boom box

Of course, you may well choose to keep your iPod and use this powered add-on audio system to make it sound even better! The high-powered amplifiers let you boom your mixes across the street, and the built-in iPod dock means that you can use the sync and data transfer options as well. With a total power of 4 W RMS, this pocket blaster may look tiny, but makes a big sound. An added plus—run the system through the power mains and charge your iPod as you hear it rock.

Price: US\$ 149

◀◀ Samsung 'yep' YP-910GS Napster Digital Audio Player Yep, it rocks

Samsung's newest portable music maker has 20 GB of hard drive space, a built-in FM transmitter, and also acts as a backup device. The yep comes with built-in USB 2.0 support, and a charming feature—direct MP3 recording. Connect the line-out from your tape player or LP and make MP3s on the fly—no PC needed! And yes, yep connects seamlessly to the re-born Napster 2.0 service!

Price: US\$ 349.99
