

Couch potato

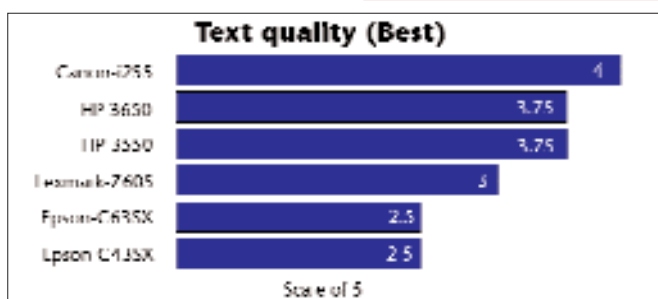

As compared to last year, the Lexmark Z605 shows a quantum leap for Lexmark in terms of performance and quality, but still has a long way to go.

The Lexmark Z605 has evolved from a pedigree of products that sported elegant looks. The use of a light and dark grey panel gives it an identity of its own. The design cues are classic Euro-

The Lexmark Z605 comes with a 100-paper capacity top loading paper tray. The output paper tray extends out of the main body and spans enough to hold the printed papers in place. The cartridge holders are flimsy and you have to be careful when installing them. The printer installation was easy. The driver pack, among the best in the business, is quite intuitive. The printer switches itself off when the PC is switched off.

Priced at Rs 2,599 plus taxes, the Lexmark Z605 is the cheapest inkjet printer around. As far as recommendations go, there are better printers around that cost a tad more, but are faster and better.
