

Canon LBP2410

Fast and colourful

It took 16.7 seconds for the LBP2410 to print our test document. This time includes the warm-up time, which was 9 seconds. For 10 pages, it clocked 52 seconds. This means the 2410 is fast when you print several pages at the same time, and not so much so for single printouts.

We also tested the printer for image quality using the same test image we used for inkjet printers. The image was dark with a lot of banding. Also since the image was on the warmer side, the contrast took a beating. However, the LBP2410's performance in the combo-document printing test was good: colours were vibrant, details accurate and two-point-size fonts readable. The shades of grey the LBP2410 produces are good, too. Ditto the quality of fonts printed on plain paper. The fonts were readable up to two-points, with edges straight and curves smooth.

Hence, we recommend the LBP2410 for pure text documents that use coloured fonts, fonts on coloured backgrounds and those that have images and graphics. We don't recommend it if your primary purpose is printing images.

The LBP2410 is compact, but not light. Rated speeds are 16 ppm in mono mode, and 4 ppm in full-colour mode. The printer

is Canon Advanced Printing Technology (CAPT)-capable, which means you won't have to invest on additional printer memory, as your system memory is utilised. The paper tray is like the ones found in inkjet printers, and it can hold 125 sheets. There's one output tray on the top, and one on the back. By default, the top tray receives the printed sheets, but if you open the back tray, the output sheets find their way there. The back tray facilitates the straight paper path for media such as postcards that jam inside the printer if folded.

The printer doesn't come bundled with a network card.

- + Fast for multiple copies, good quality text and greyscale
 - Not very suitable for image printing
- Price:** Rs 49.995 + taxes

HP Color LaserJet 1500L

The SoHo printer

The HP Color LaserJet 1500L printed our text page in 18 seconds, including the 8-second warm-up time. It finished the 10-document printing test in 52 seconds. This means this printer is suitable for the SoHo environment, where eight to 10 people would be using the printer. An optional network card lets you convert it into a network printer, and you can straight-away set the printer up for sharing amongst several users.

However, the 1500L took 179 seconds to print a 200 MB test image, for which the LBP2410 took just 105 seconds. As for the print quality of the image, it was nowhere near the what you get from inkjet printers—it appeared dark and had a lot of banding.

However, the combination document test returned very good results. two-point fonts were readable, and the embedded image was crisp, with excellent detail reproduction.

All this means this printer is best suited for printing presen-

tation documents, marketing collaterals, and even magazine pages: these usually have custom fonts, images and various colour tones. The 1500L is a fast colour printing solution for SoHos and departments within big organisations. Graphic design houses would be better off using inkjet printers for quality image prints.

- + Compact and light
 - + Fast 17 ppm text printing speed
 - Flimsy paper tray mechanism
- Price:** Rs. 44,999 + taxes
