

BenQ S830C Mobile Phone

Flip it open

The BenQ S830C has dual LCD screens. Colour clarity is reasonable, though the screen is hardly readable under direct sunlight or when the backlight goes off.

The left softkey activates the silent mode if pressed and held for a couple of seconds. The phone memory can hold 500 entries. Features such as MMS, and predictive text input are supported. Voice clarity is quite good, and it detects weak sig-

nals too. However, images taken using the tiny external camera attachment appear grainy. PC synchronisation is also an area of concern.

Though the BenQ S830C is above average as far as voice clarity and feature set go, the Rs 12,450-plus price tag is a tad too high.

SPECIFICATIONS

Dual band for GSM900/1800; Dimensions: 87 x 45 x 19 mm; Weight: 98.5 gm, integrated WAP 2.0 microbrowser, seven caller groups for identification, IR port

Price: Rs 12,450 (Rs 2,000 extra for camera attachment)

Ennyah GeForce FX 5700

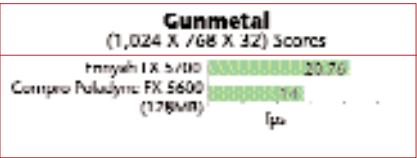

High performance, low price

This NV36 core-based chip has 256 MB DDR II memory that provides bandwidth in excess of 14.4 GBps. A TV encoder chip with support for MPEG 2 decoding is included. The Y-cable (S-video to RCA and stereo cable) is also provided.

In the Gunmetal benchmark, it returned 20.76 fps at 1,024 x 768, and beat the 3D

averaged 32.31 fps at a resolution of 1,024 x 768.

Priced at only Rs 8500, it has an amazing price to performance ratio.

SPECIFICATIONS

425 MHz core clock, 500 MHz memory, 256 MB DDR II memory, 0.13 micron fabrication process, 14.4 GBps memory bandwidth, 1.9 billion texel per sec fill rate, AGP 8X interface, DVI connector
