

Xerox PE16 All-In-One

A better scan please

Xerox PE16 is laser multi-function device that can print, copy, scan and fax. The printer is capable of printing at a maximum speed of 16 pages in normal mode and can go up 600 dpi if the document includes images or graphics.

The printer tray can hold 250 pages and has separate slots to manually feed in single paper sheets or media such as envelopes, greeting cards, transparencies and so on. However, the support tray is missing here and the user needs to push the media in the slot, which is then pulled in by the printer.

The flatbed scanner is bundled with an Automatic Document Feeder (ADF) that can hold a maximum of 30 sheets at a time. The scanner is capable of scanning documents and images at the maximum resolution of 1,200 dpi

at 24-bit colour depth.

The PE16 is a stand-alone copier too, which means you can get as many as 99 copies of a document directly from the unit. The menu allows you to set the type of pages and the number of copies. A hot key on the keypad allows you to set the contrast and quality level. The toner save button provided on the keypad is a good feature that can be enabled to get more copies as less toner is used. The prints were light after we enabled this feature but were good enough for use in office environments.

PE16 is also a full-fledged fax machine and boasts all the features of a standalone fax machine. Use the ADF to send multiple faxes to a single number in one go. The broadcast feature lets you send a single document to multiple numbers. Set a group
