

On the File menu, click Save As.

In the Save as type list, click Design Template.

Name the file and click Save.

Another extra that can really help: add instructions about special formats, font choices, or video clips in the Notes area (under each slide), if others will be using your template.

Creating a Photo Album in PowerPoint 2002

You can use PowerPoint 2002 and later to create a photo-album presentation. To create this, go to **Insert > Picture > New Photo Album**. The Photo Album dialog will open. Now click the File/Disk button to add any picture that's stored on your computer, or click the Scanner/Camera to add pictures from a scanner or camera. Hold down [SHIFT] to select multiple images. Using this dialog, you can choose the layout of the album, convert pictures into greyscale, adjust the brightness and contrast or rotate the image. When you are done, click 'Create' to create the presentation. If you need to modify any of these changes later, just go to **Format > Photo Album**.

Bet you didn't know

Schedule 'Response to e-mail' in MS Outlook

As much as you'd like to, you can't always respond instantly to every e-mail message. If you did, you'd never get any work done. To make sure that you don't forget to answer important messages, move them to your calendar so you can set aside a specific time to respond, or add them to your task list as a reminder. To turn an e-mail message into an item on your calendar or task list:

1. Drag the message from your Inbox onto the Calendar icon or Tasks icon on the Outlook Bar or onto your Calendar or Tasks folder in the Folder List. This will create a new appointment item.
2. If you are moving the item to the calendar, enter the date and time you want to reply and specify any additional options you want. (The body of the e-mail message is automatically added to the appointment.)
3. Click Save and Close to add the appointment to your Calendar or Task list.
4. You can drag items between all Outlook folders, including Inbox, Tasks, Calendar, Contacts, and Notes. For more options, right-click before you drag.

Reducing the size of presentations

When you add pictures to presentations, the size increases. To compress pictures in PowerPoint, open the presentation and click any image. The images toolbar should be visible now. If it doesn't appear, right-click on any toolbar and choose Pictures. On the picture toolbar, click the Compress Pictures button. If you can't

locate the button, simply hover your mouse over the buttons and read the tool tips.

In the dialog box that appears, choose 'All pictures in document' in the 'Apply to' section.

Compressing pictures in presentations

field. Choose the appropriate resolution, depending on what the presentation is intended for—if you don't plan to print the slides, choose Web/Screen option. Click OK and the images will be compressed.

Converting slides to images

You may want to convert individual slides into

images, say, in order to e-mail it to someone. All you have to do is: open the presentation in PowerPoint, scroll down to that slide and click **View > Notes Page**. Here you'll see that the slide occupies half of the page as an image. Right-click on this image and choose 'Copy'. Now open any graphic application such as MS Paint or Photoshop, paste the copied image there and save the file.

MS Outlook

Colour code your Calendar

Outlook provides 'labels' which allow you to colour-code your appointments by choosing from various label types and colours. So, with a quick glance you get to see the types of appointments at hand.

Instead of the normal calendar, your calendar can look like the one in labels.bmp.

To colour-code your calendar, right-click an appointment, point to Label, and then click the label you want. Or,

Some useful keyboard shortcuts

Keyboard shortcuts help you work faster with any application. PowerPoint has shortcuts too. Here are some of them:

To	Press
Start a presentation	[F5]
Advance to the next slide	[N], Left-click, [Spacebar], →, ↓, [Enter], or [Page Down]
Return to the previous slide	[P], [Backspace], ←, ↑, or [Page Up]
Go to particular slide	Number followed by [Enter]
Make the screen blank	[B] or [.]
Make the screen white	[W] or [,]
Show or Hide the arrow pointer	[A] or [=]
Erase drawings on a screen	[E]
Change pointer to pen	[Ctrl] + [P]
Change pointer to arrow	[Ctrl] + [A]
Change pointer to eraser	[Ctrl] + [E]
Hide pointer and button	[Ctrl] + [H]
To get help on keyboard shortcuts	[Shift] + [?]
