

I have saved more than Rs 12,000 after enlisting WeP's services.

Tarun Arora
MD NCCB India Ltd

laser printer and within months had all types of printers installed in the organisation—personal, workgroup, departmental and centralised printing.” For WeP, the competitive costing to the clients came from the fact that they had a huge installed capacity and their transactional operational costs were low.

So, how did this affect NCCB? According to EDP head Kohli, the efficiency improved. He says, “We did not have to worry any-

more about either the maintenance, or the service of the printers. Right from changing of toners to servicing the printer, everything was taken care of by WeP.” He remembers the days before WeP, when any of their printers broke down, endless phone calls and reminders to the service people seemed a routine. But with WeP, all this was taken care of. The service was quick, and the turn around time was less than two hours. The prompt service helped NCCB add to its productive man-hours.

Customerspeak

“The 15-year-old Xpress Couriers had branches all over Tamil Nadu. Like any other courier company, their printing involved addresses to be handed to the delivery staff. They used to generate manual PoDs (Proof of Delivery), which were often inaccurate due to poor handwriting. Ten months ago, a chance meeting at the Logistics Exhibition of the Managing Director Vijay Kumar with Mr Srinivasan of WeP, led the former to outsource the printing to WeP. The company set up a system whereby PODs could be generated via the printer. This was more accurate and quicker. Today, Mr Kumar saves an average of Rs 25,000 monthly.”

The Present

According to Thomas, “NCCB from a stage of owning its printers is now completely dependant on the services of WeP.” It’s been a little more than year now, since NCCB availed the printing services of WeP, and they are not complaining. Arora says, “Last year I have saved more than Rs 12, 000 after enlisting WeP’s services”. Recently, WeP has reduced the per page rate to 85 paise for NCCB, while the consumption has gone up to 20,000. Also, after the successful implementation in Delhi, the Kolkata and Mumbai branches of NCCB are all set to outsource printing to WeP.

For Arora, outsource his printing requirements paid off. Efficiency increased, there was no tension of maintaining printers, but most importantly, it cut costs significantly. Innovation is important, but information even more so. In the end, it was information about a service that saved the day for NCCB.■
