Making Sense of the Mad Ad World

In 1995, three friends had an brainwave—use the Net to deliver advertising solutions. This is the story of how a simple idea turned into a moneyspinner

Meera Vankipuram

When Sachin Karweer of Hinduja TMT's Digital TV services—Incablenet, was looking to offer an Electronic Programme Guide (EPG) to his subscribers, he turned to Mumbai-based Mediaware Infotech (www.mediaware-infotech.com) for help. Thanks to Mediaware, a media solutions provider, "Incablenet is today India's first MSO (Multisystem Operator) to offer EPG to its viewers," according to Karweer.

Mediaware offers HTMT, and several other media organisa-

tions in India and abroad, customised database and workflow management solutions. Mediaware's software solutions are employed by advertising agencies, media researchers, media buyers and planners, client accounting staff at ad agencies, advertisers, and TV channels.

Mediaware maintains a comprehensive database of non-syndicated media related information, collected, updated and maintained in an electronic format by the Mediaware Database Group. The database can be accessed by paying a subscription fee, and benefits media buyers, advertising agencies, advertisers, print publications, TV channels, PR and market research agencies. This is essentially a collection of ad rates, circulation details, contact information (for print publications), and
