Using this system, SMS messages and sometimes e-mails are quicker and easier to write. Often referred to as T9, the most popular type of predictive text entry. The competitor to T9 is iTAP by Motorola.

PTT (Push-To-Talk) A two-way communication service that works like a "walkie talkie". This feature allows communication in only

direction at a time unlike a cell phone that allows for simultaneous conversations.

PUK (Personal Unblocking Key) used to unblock a blocked SIM card; this code is given during the subscription of a phone.

R-UIM (Removable User Identity Module) Introduced by the CDMA
