

Phone Works

Mailing Your Voice

Each voice "envelope" contains your digital voice, with the IP address of the destination number on the outside

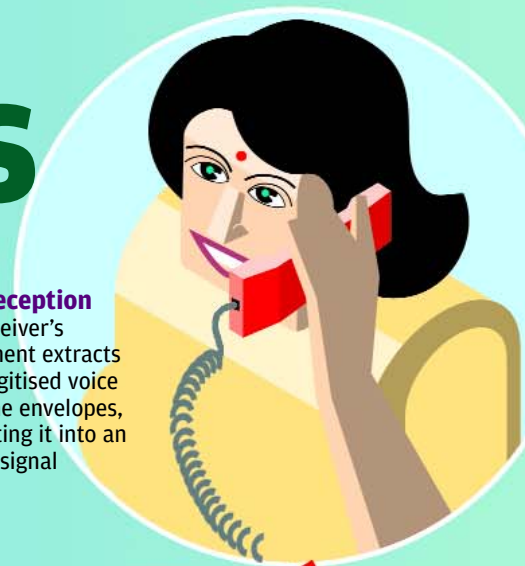

010101110011100101
010101110011100101
010101110011100101

Call Reception

The receiver's instrument extracts your digitised voice from the envelopes, converting it into an analog signal

Call Placed

Your voice envelopes traverse the Internet from router to router, finally reaching the destination IP
