

region and get a snapshot of just the clients in that region. Here's how you to use the feature: first click a cell in the list you want to filter. You should choose a cell that appears in a row that contains a heading and related data, such as a set of client names or phone numbers. Now on the 'Data' menu, point to 'Filter', and then click 'AutoFilter'. Arrows will appear at the heading of each column. Click an arrow, and choose your filter criteria from the drop-down menu. For example, you could filter for a number that's greater or less than a target figure. Now only rows containing data that meet the criteria will be displayed.

Switch Between Absolute And Relative Cell References

 When you create a formula in Excel, the formula can use relative cell references, which refer to cells relative to the position of the formula, or absolute references, which refer to cells in a specific location. Formulas can also contain a mix of relative and absolute references. An absolute reference is indicated by the '\$' symbol. For example, `$A$1` is an absolute reference to column A, row 1. When working with formulas, you can easily change column and row references from relative to absolute, and back again, using this handy shortcut: first select the cell that contains the formula. In the formula bar, select the reference you want to change. Press [F4] to toggle through the combinations.

Quickly Calculate A Person's Age

 This tip is a demonstration of the DATEDIF() function in Excel, which calculates the number of days, months, or years between two dates. So, this function makes it easy to calculate a person's age. To try this tip, in a blank worksheet, type the birth date in cell A1, using slashes to separate day, month, and year. In cell A2, type `"=DATEDIF(A1,TODAY(),"y")"`

(without the beginning and ending quotes) and press [Enter]. The age in years will be displayed in cell A2.

Clear All Spreadsheet Formatting

 Here's an easy way to quickly clear all formatting in your Excel 2002 spreadsheet. Click any cell in the spreadsheet and then press [Ctrl] + [A] to select all cells in the worksheet. Then on the 'Edit' menu, point to 'Clear', and then click 'Formats'.

Combining Text From Different Cells

 The '&' symbol consolidates text information in the same way as the '+' symbol adds numbers. The space between quotation marks adds a blank character between the separated texts. To combine text using '&': in cell A1, enter the text "Digit" (without quotes). In cell A2, enter the text "is a great". In cell A3, enter "magazine". Now in cell A5, type the formula: `=A1&" "&A2&" "&A3`

MS POWERPOINT Create Bitmap Images of Slides

 If you want a quick way to send a single PowerPoint slide to someone, you can try converting the

slide into a bitmap image. You can then resize, crop, and paste it into an e-mail message or an Office document. Here's how: open the slide you want use as an image. On the 'View' menu, click 'Notes Page'. The slide will appear on the notes page as an image. Right-click the slide image, and then click 'Copy' on the shortcut menu. The image is now stored on your clipboard, and you can paste it as a resizable object into any Office document.

Create A Photo Album Presentation

 Did you know you could use PowerPoint version 2002 to create a photo album? Here's how. On the 'Insert' menu, point to 'Picture', and then click 'New Photo Album'. In the 'Photo Album' dialog box, you can choose to add pictures from your hard disk or a peripheral device such as a scanner or digital camera. To add a picture from a file or disk, do the following: under 'Insert picture from', click 'File/Disk'. Locate the folder or disk that contains the picture you

want to add to your photo album, click the picture file, and then click 'Insert'. Repeat for as many pictures as you want to add to your photo album. Or to capture them all at once, hold down [Ctrl], click each picture file you need, and then click 'Insert'. Next, specify the look of the album under 'Album Layout'. Finally, click 'Create'.

Cut Graphics Down To Size

 Adding a few images can make the size of your PowerPoint presentation huge. You could compress images manually, but there's a simpler way. PowerPoint 2002 can do it for you. On the 'Picture' toolbar, click the 'Compress Pictures' button. (If you don't see the Picture toolbar, point to 'Toolbars' on the 'View' menu, and then click 'Picture'.) To compress all pictures in the presentation, click 'All Pictures in Document'. Under 'Change Resolution', select how you intend to use your presentation by clicking either 'Web/Screen' or 'Print'. To further reduce file size, check the 'Delete Cropped Areas of Pictures' check box. Click OK.

PowerPoint Animations

 In PowerPoint 2002, adding animation for professional-looking presentations is not only easy, it's fun. To apply a custom animation, in normal view, display the slide that has the text or objects you want to animate. Select the object you want to animate. On the 'Slide Show' menu, click 'Custom Animation'. In the 'Custom Animation' task pane, click

PowerPoint animations can spruce up your presentations, and they are fun to make too
