

## Bring Up The Main Menu By Pressing A Key

 To have the main menu (File, Edit, View, and so on) accessible through a single key rather than at the top of the browser: in opera6.ini, under User Prefs, type in:

Show Menu = 0

Then edit input.ini:

[Application]

F10 = Show popup menu, "Browser Menu Bar"

This will bring up the menu with [F10].

## Make A URL Accessible With Two Clicks

 Say you want to add an item to the right-click menu that will open [www.thinkdigit.com/forum](http://www.thinkdigit.com/forum). In menu.ini, under [document popup menu], type in:

Go to page,

"<http://www.thinkdigit.com/forum>"

## Easy Page Navigation

 In the toolbar.ini file, add the following lines to the [Document Toolbar] section:

Button2, "Top"=Go to start, , , "View to"

Button3, "End"="Go to end, , , "View from"

This will give you an easy way to scroll to the bottom or top of a page.

## Load Multiple URLs From A Text File

 If you right-click on the Opera icon and go to Properties, the "Target" line reads something like "C:\Program Files\Opera8\opera.exe".

You need to change this by adding whatever URLs you want to open, so that it reads something like

"C:\Program Files\Opera7.20.3nnn\opera.exe" <http://www.opera.com> <http://www.google.com>

If you save this line as a batch file (opera.bat), you've set up a shortcut to the desktop that just needs to be double-clicked.

## Mouse Gestures

 Because of the sheer number of mouse gestures available in Opera,

they may take some time getting used to, but will greatly enhance your browsing experience once you're used to them.

Here's a sampler of what you can do with the mouse in Opera.

 To go to the previous page: hold right button and click left button OR

Hold right button and move the mouse left

 To go to the next page: hold left button and click right button OR

Hold right button and move the mouse right

 Fast forward (Go to the end of the list of pages visited):

Hold right button, move the mouse right then up OR Hold right button and [Shift], move the mouse right

 Rewind (Go back to the first page visited): Hold right button, move the mouse left then down OR

Hold right button and [Shift], move the mouse left

 Go to home page: double-click in an empty page

 Reload page: hold right button, move the mouse up then down

 Stop loading: hold right button and move mouse up

 Restore or maximise page: hold right button, move the mouse up then right

 Minimise page: hold right button, move the mouse down then left

 Close page: hold right button, move the mouse down then right OR

Hold right button, move the mouse right-left-right

 Open link in a new page: move mouse pointer to link and hold right button, then move down

 Open link in a new page in the background: move mouse pointer to link and hold right button, move down then up

 Zoom in and out: hold [Ctrl], roll mouse wheel up or down

 Restore default zoom: hold [Ctrl], click mouse wheel

 Move back and forth in page history: hold [Shift], roll mouse wheel up or down

 Cycle through open pages: hold right button, roll mouse wheel up or down

 Open a blank page: hold right button, move the mouse down

## Dragging And Dropping

 Dragging a link to the bookmarks panel or a toolbar saves it as a bookmark.

Dragging a bookmark to the workspace or Web page area opens the bookmark.

Tabs can be rearranged by dragging them on the page bar.

Notes can be dragged into e-mail messages for automatic pasting.

Drag a download link to the transfers panel to start downloading.

[Ctrl] + [9]

 Open 'Windows' panel:

[Ctrl] + [0]

 Close Opera: [Ctrl] + [Q]

 Hide Opera: [Ctrl] + [H]

## Eudora

### Access Your Gmail In Eudora

 You may want to access your Gmail mails in Eudora, or send mails through your Gmail account from Eudora. To do this, you'll first need to enable POP access in Gmail. Here's how: first, choose 'Settings' from the top Gmail navigation bar. Select the 'Forwarding and POP' tab. Make sure that either 'Enable POP for all mail' or 'Enable POP only for mail
