

HP IPAQ HW6515 MOBILE MESSENGER

For those who gallivant around the globe, the new iPAQ hw6515 Mobile Messenger is the perfect companion. One of the latest PDA phones launched by HP, the hw6515 Mobile Messenger is true to its name and keeps you connected no matter where you are.

Featuring a quad-band GSM phone (850/900/1800/1900 MHz), the device also supports GPRS/EDGE technologies, which provide high-speed connectivity on the go.

Boasting of an internal GPS receiver, the iPAQ hw6515—coupled with GPS software and digital city maps—is capable of pinpointing your exact location and provides you with turn-by-turn driving instructions. The integrated QWERTY keyboard allows you to easily compose e-mail, notes, text, and instant messages. The inclusion of two memory slots—one SDIO and one mini-SD—allows expansion of memory as well as installation of expansion cards such as Wi-Fi, barcode scanners and more.

What's more, you also get a 1.3-megapixel HP Photosmart

Rs 29,990

Camera inbuilt so you can capture stills and videos—and share them instantly via MMS or e-mail.

Running Microsoft Windows Mobile 2003 Second Edition, the hw6515 is powered by an Intel PXA270 Processor running at 312 MHz complemented by 64 MB of ROM and 64 MB of SDRAM. The 240 x 240 transreflective touch screen can display 64K colours.

Connectivity options include Bluetooth v1.2, Infrared and USB using the bundled cradle. The 1200 mAh rechargeable Li-ion battery is user-replaceable.

HP has also bundled exclusive applications like iPAQ Wireless, GSM/GPRS Settings Manager, Profiles, MMS Composer, Bluetooth Manager, iPAQ File Store, iPAQ Backup, Pocket Panel Lite, and HP Image Zone for Pocket PC.

The package includes a removable flip cover for the screen, as well as a belt clip so you can carry it around wherever you go. Priced at Rs 29,990 excluding taxes, this is one workhorse you should seriously consider.

PALM LIFEDRIVE MOBILE MANAGER

If you need an integrated camera or a cell phone, look elsewhere. But if you're looking for a device that can manage your chaotic life schedule, the aptly named LifeDrive Mobile Manager is for you.

The device runs on Palm OS 5.4 (Garnet) and is powered by a 416 MHz Intel XScale Processor complemented by 64 MB of onboard RAM, and offers a whopping 4 GB of storage space. It looks sleek with a brushed, muted aluminium finish, a big screen (a 320 x 480 TFT touchscreen) and four dedicated buttons for music, photos, home (main menu) and the file browser, along with four-way navigation and a centre-click button.

The 65K colour screen is gorgeous. Multimedia entertainment is provided by the mobile version of iTunes. Other pre-installed goodies include the Blazer 4.1 Web Browser and the Versa Mail 3.1 e-mail client. Apart from these, the software disk provided has some more cool stuff such as Adobe Reader for Palm OS and Real Rhapsody 3.0, amongst others. 'Documents to Go' allows you to work with MS Word and Excel files.

You can connect the LifeDrive to your phone via Bluetooth and send and receive SMSes and make calls. In terms of connectivity, the LifeDrive has it all: Wi-Fi, Bluetooth, USB 2.0—but no infrared. But will you miss it?

Synchronisation with a PC requires the bundled application, but you can use it simply as a removable mass storage drive by clicking a single button labelled 'Drive Mode' on the touchscreen. You can then simply copy and paste files onto the drive. All files—music, movies, and what have you—that are added get updated automatically into the media library, and there is no stifling requirement of using a proprietary software to transfer media files.

A PDA phone or a camera this device is not, but what it is is a brilliant organiser and portable entertainment centre that will organise your life. And it does that job quite beautifully.

At Rs 26,500, it's not that expensive either. Buy a cheaper cell, and use this, what?

Rs 26,500

PALM ZIRE 31

If you're a first time user or if a basic PDA is what you are looking for, the Palm Zire 31 is made for you. This affordable PDA runs Palm OS 5.2.8, and is powered by a relatively modest 200 MHz Intel ARM-based processor.

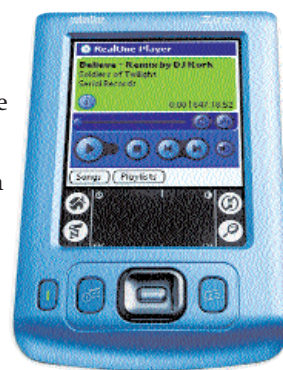

Inbuilt memory is only 16 MB, but that should be enough for you to store years of appointments and thousands of contacts—with room to add software. The SDIO slot lets you add more memory, too. Screen resolution is 160 x 160, supporting thousands of colours.

The design is compact and fairly attractive. There are two hardware buttons that launch calendar and contacts. You can also reassign these buttons to applications of your choice. A five-way navigation key is also provided.

Graffiti 2 lets you input text in natural handwriting, either in the Graffiti area beneath the screen or anywhere else on the screen. You can even use the Zire 31 as an MP3 player, though you would need to invest in an SD or MMC card for this.

Bundled software includes standard PIM applications such as Contacts, Calendar, World Clock, Memos, Tasks, Calculator, Expense, and Note pad. Additional software included features RealOne Mobile Player, palmOne Photos, Audible, Handmark Splash Money and Mobile DB, powerOne Calculator, Palm Reader, AddIt, and Solitaire.

At just Rs 9,999, the Zire 31 is surely the most affordable and easiest way to enter into the world of mobile computing.
