

MFDs

Office Inkjet MFDs

Lexmark X7170

Specs: 1200 x 4800 Optical Scan Resolution, PictBridge-Ready, Input and Output Tray Capacities of 100 and 25 Sheets Respectively, Flatbed and Sheet-fed Scanning Elements

Our Verdict: The first thing you'll notice about this printer is the great user interface. Print quality is decent; optical scan resolution, one of the highest in its segment; and scan quality, again, is one of the

highest in its segment.

Though this is not the top scorer across all segments, it does have an edge over the others when you take the whole picture into account. It is competitively priced, ink consumption is the lowest in its class, and it's a great performer to boot!

Runner-Up: HP PSC 2310 All-in-one

Photo Inkjet MFDs

HP Photosmart 2608 All-in-one

Specs: 2400 x 4800 Optical Scan Resolution, PictBridge-Ready, MMC Reader, Input and Output Tray Capacities of 150 and 50 Sheets Respectively, Flatbed CCD Scanner

Our Verdict: The 2608 has an MMC card reader, and is PictBridge-compliant—so you can print without the need for a PC. The print unit uses traditional Black and Colour cartridges.

The scanner unit supports scanning of A4-size media at 24-bit colour depth

and resolutions as high as 2400 x 4800.

Print speeds are blazingly fast with all types of documents, without print quality being sacrificed. Scan quality is no less amazing.

Stunning performance together with very competitive pricing make the HP Photosmart 2608 a winner.

Runner-Up: None

SoHo Laser MFDs

Canon MF 3110

Specs: 1200 x 600 dpi x dpi Print Resolution, 1200 x 2400 Optical and 9600 x 9600 Interpolated Scanning Resolution, 250-Sheet Input Tray Capacity, Flatbed CCD Scanner

Our Verdict: This unit's printing resolution—1200 x 600 dpi—is the highest amongst the MFDs we tested in its category. It also boasts of the highest optical scan resolution of 1200 x 2400 dpi. The 15,000-page duty cycle, again, is the highest in its class.

The 64 MB of buffer memory means the printer can accept large and complex document print jobs at one go; it doesn't

depend on the computer to send the document in chunks—which is the way complex print jobs are handled by printers with a smaller buffer.

This MFD gives decent-quality scans, and is one of the lowest-priced MFDs in this category. Canon has 130 service centres where you can avail of service and the one-year on-site warranty.

Runner-Up: Lexmark X215

Workgroup Laser MFDs

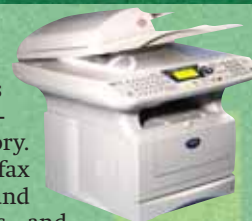

Brother MFC-8440

Specs: 1200 x 600 Printing Resolution, 600 x 2400 Scan Resolution, 250-Sheet Input Tray Capacity, Flatbed (CCD) and Sheet-Fed (CIS) Scanner

Our Verdict: The Brother MFC-8440 is one rugged MFD, which bundles in a fax unit. The printer duty cycle is huge—20,000 pages! There is a flatbed CCD scanner as well as a sheet-fed CIS scanner to handle various types of scan jobs. The presence of an ADF (Automatic Document Feeder) means you won't have to keep manually feeding in sheets to be scanned—the ADF does the job for you.

This unit has the highest print as well as scan resolutions in its category. The unit features fax with broadcasting and scheduling features, and the fax memory stores up to 600 pages.

This MFD was reasonably fast in text printing, and the print quality, in general, was much better than that of other MFDs in its class. Brother has a decent network of service centres across India and offers a three-year on-site warranty.

Runner-Up: Samsung SCX-4720F
