

For Intel Processors (High-End)

MSI P4N Diamond

Specs: LGA775, Supports Intel Dual-core Processors, nVidia nForce4 SLI Intel Edition, DDR2 667 MHz, Dual Gigabit LAN

Our Verdict: The P4N Diamond has Creative SoundBlaster Live! 24-bit on-board, an external SATA port, and a Bluetooth/Wi-Fi combo card. It also has MSI's Core Cell chip which allows real-time dynamic overclocking, power saving, and diagnosis of temperature and CPU fan speed.

The board returned very high scores in the ZD-Bench Business Winstone 2004, which is indicative of real-world performance in office applications.

The P4N Diamond is steeply priced, but its exceptionally good feature set and great performance make it a winner.

Runner-Up: **Asus Proactive P5ND2-SLI Deluxe** and **MSI P4N SLI**

MP3 PLAYERS

Flash-Based MP3 Players - 1 GB

Samsung YP-T8

Specs: Flash-based 1 GB, Internal Li-Ion Rechargeable Battery, 262K TFT LCD Colour Screen, Supports Audio (OGG, MP3, ASF, WMA) and Text Files, Photo Viewer, Video Playback, USB 2.0, Voice Recording, Firmware Upgradeable, FM Tuner, Direct Line-In Recording

Our Verdict: The ergonomics and ease of use of the YP-T8 is superior to that of any of the flash-based players we've seen so far. Not only is it portable, the placement of the menu buttons is very comfortable. The video playback feature makes the YP-T8

stand out as a unique solid-state MP3 player.

The 262K colour TFT-LCD screen gives vibrant video playback. Data transfer speeds between a PC and the YP-T8 is the fastest amongst the solid-state MP3 players we saw. Bundled accessories include a neck strap, a USB cable, earphones, a line-in cable, a pouch, and an installation CD.

There are many preset equaliser modes on the YP-T8, but we felt the sound quality lacked some punch. Overall, however, the Samsung YP-T8 is a feature-rich product at an affordable price.

Flash-Based MP3 Players - 256 MB

Yes YMP-910

Specs: Flash-based 256 MB, Internal Li-Ion Rechargeable Battery, 65K LCD Colour Screen, Supports Audio (MP3, MP2, WMA, ASF, WAV), Text and Photo Files, USB 2.0, Voice recording, Firmware Upgradeable, Direct Line-In, FM Tuner and Recording, 5-Preset Equaliser, A-B Repeat

Our Verdict: YES... it is a sturdy YMP-910! Longitudinal in shape, the portability of this player is remarkable, but the placement of the menu and navigation buttons is just about satisfactory.

The YMP-910 can be used as a TV remote control (IR). Bundled accessories include a USB cable, a neck-lace ear-phone, a carry case, a line-in cable, an arm-band, and an install CD.

Audio quality is very good—it can play heavy bass and extreme treble without any distortion or noise. IR remote control ability is a feature unique to this player, and it also records a high battery life.

Hard Drive-Based MP3 Players

Samsung YH-J70

Specs: 30 GB, 262K TFT LCD Colour Display, USB 2.0, Supports Audio (MP3, WAV, WMA, OGG), Video, Photo and Text Files, FM Tuner and Recording, Line-In Encoding, 11-Preset Equaliser, A-B Repeat

Our Verdict: "Now watch movies on the move"—that's the message the Samsung YH-J70 is giving out, with 30 GB of storage capacity and video playback capabilities on a 262K colour TFT LCD colour screen. Samsung has not compromised on audio

playback performance; it can play heavy bass and extreme treble without noise.

Bundled accessories include a case, earphones, a line-in cable, a USB cable, a docking cradle, and the installation CD. Menu and navigation buttons are well-placed on the sleek dual-tone casing. Top all this up with dashing looks!

Runner-Up: **iRiver H10**
