

your colours. Also embed the fonts you use, this way, even if your printer doesn't have these fonts on the PC, your publication won't be affected.

Beyond Print

Establishing a presence in print is not really enough for today's businesses—the word must be spread, and the Internet is just the way to do that. Publisher also offers a number of templates for a basic Web site that would tell your customers about you. The best way is the Easy Website Builder, which lets you specify exactly what your site will contain.

Creating a Web site is a snap with the Easy Website Creator in Publisher

Publisher also offers HTML templates for e-mail messages, be it to inform your audience of an upcoming event, a new addition to your product or services list, or just general correspondence.

So Is It For Me?

Despite all its advantages, using Publisher isn't entirely a bed of roses. While it's all very well to lay out a few pages of text, the autoflow feature is rather eccentric. If your publication is more than a few pages long, it will be an uphill task! You cannot directly manipulate the HTML code in your Web page. Publisher isn't capable of much beyond what you can do using its wizards. It is best for its wide choice of templates that make your publication process quick and easy, but it won't make professionals happy just yet. ☒
