Software missing?

I recently purchased your January 2006 issue. On the magazine cover, it was stated that in the Internet section there was the Zone Alarm Internet Security Suite, and also that in the System section, there was Windows 98 SE Service Pack 2.1. I purchased the magazine because of this.

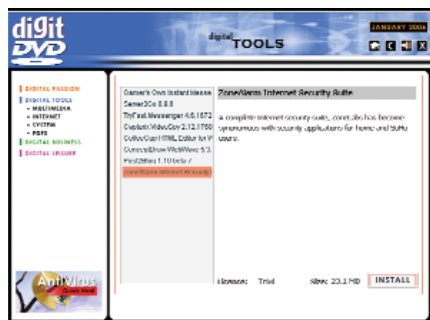

To my surprise, neither of the software were on the CD given along with the magazine. Kindly look in the matter.

Ashok Kumar D

Dear Ashok,

Both the software you've mentioned are on the Digit DVD. You will not be able to find them on the CD. Very often, people confuse the contents of the DVD and CD, and such misconceptions happen. The screenshots below should help you find the software you mentioned.

A Goof-Up

I find Digit an extremely useful tool to keep myself updated with what's happening in the computer world. However, your January 2006 issue wasn't up to the mark. Firstly, the CD I received is defective. Secondly, the demo of *Need For Speed Most Wanted* (NFSMW) was in this issue, whereas another leading magazine had it in the December 2005

issue. I had to get the demo from one of my friends who purchases that magazine.

Moreover, the picture model, Brooke Burke, on the DVD cover, is that of *Need For Speed Underground 2* (NFSU 2), and not of NFSMW (Josie Maran). I was simply shocked to see a magazine like Digit making such mistakes. I hope the game demos will be given on time, and that something will be done about the defective CD.

Sanjit Kumar Keshri

Dear Sanjit,

Our apologies for the cover. It was a goof-up, and we were about to include it in a corrigendum when we got your mail. That was a totally avoidable mistake, and will not happen again.

The NFSMW demo could not be included in the December issue because of space constraints—basically, the DVD was packed to the brim. Rest assured, most often you will get everything as and when it is released!

Wannabe DJ?

I am a regular reader of your mag and am mad about it. You guys rock. I came across it at a newsstand, and buy it every month from my pocket money. A student in the 11th standard, I have made an account in Digit Patron only last month, as I didn't know non-subscribers could have an account.

Can you include more sound and DJ software? I love the profession. Can you include a trial version of dance eJay 7, and could you let me know from where I can get the full version?

If you can, please also include an article on DJs using various software. Can you also tell me that how I can have an account on your forum?

Priyam Malhotra

Dear Priyam,

We're so glad to know that you not only appreciate our magazine, you buy it off your precious pocket money. Regarding the Digit Patron programme, yes, it's for anyone who buys Digit. Your suggestions for DJ software have been noted, and we'll try to include it on a future CD/DVD. As for the article, we've certainly been mulling over it for quite some time, and will be able to fulfil this wish of yours soon. For an account on our forum, log on to www.thinkdigit.com/forum and click on the Register link at the top left. Follow the instructions thereafter.

A Record Battle?

I am 14 years old and have been reading Digit since I was eight! You mentioned that your youngest reader was in the seventh standard, but I've been reading your magazine since I was in fourth grade. Yours is the best computer magazine in the universe! I aspire to work in embedded technologies, and would love it if Digit wrote an article on embedded software programming.

I would also like if you could make a Fast Track to the Windows Registry, I would also like you to make a section on your magazine on Linux—I think it's the future of OSes. I also think you should also include a few pages on programming in C++ or Java.

Akshaykirti Sharma

I was nine when I picked up my first copy of Digit! I subscribed the same year, and am still a subscriber. Digit inspired me to do C++ at the age of 10, and Java and SQL at the age of 11. I'm now in the ninth standard, and perhaps the most tech-savvy guy in town, courtesy Digit!

I love your magazine—every single article—but the best innovation you have brought to it is the full-length reviews with screenshots of new games. Do try to include more freeware, especially multimedia software, rather than demos and shareware, on your DVD and CDs. Keep innovating!

Ranjodh Dhaliwal

Dear Akshay and Ranjodh, Thanks for the suggestions, many of which should be implemented soon. We were pleasantly surprised to hear that you've been reading Digit since the fourth and fifth standards respectively. The age at which our readers start reading Digit seems to be constantly dipping! We try to keep the language simple in most articles, mainly so younger and not-so-tech-savvy people can enjoy them. Still, fourth standard? That's got to be a new record!

The software list in the DVD or CD interface is alphabetically sorted to show freeware first, and then demos or shareware. This helps us include what's best, while also promoting all the good free software out there. We will continue to include the best software, whether free or paid!

The Fast Track ideas are great, we'll try and fit them into our plans!
