

RATEDRR

Ever wonder what a 50 cal round does to an iPhone 5? Well the good news is that so does Richard Ryan, and he

actually does it. This guy has a penchant for using armour piercing rounds on the latest cellphones and tablets. In fact just recently he was sent a bulletproof case for iPhone 5. Did it survive? Check out his channel to find out. By the way, FPS Russia is too mainstream now.

(PRODUCT LAUNCHES)

TOSHIBA KIRABOOK

Toshiba is clearly trying to reinvent itself. The 13-inch Kirabook is all metal, packs in 8GB of RAM (1,600 MHz), and a high-resolution 2,560 x 1,440 px display. Other specs include a 256 GB SSD and a core i5/i7 Ivy Bridge processor. Price: \$1599 onwards. <http://dgit.in/13k5MNH>

XBOX ONE

The long awaited next gen console from Microsoft is finally here. And packed into it this time around is an eight-core CPU, USB 3.0, WiFi direct, Blu-ray, 500GB HDD, HDMI input and output and 802.11n wireless. No word on the GPU yet.

LUMIA 925

With an aluminum body, dual-core 1.5GHz Snapdragon S4 Pro processor, 1GB RAM and 8.7-megapixel OIS camera, we hope the 2,000mAh battery will be able to keep the powerful components and 4.5-inch AMOLED screen powered. Price is a formidable \$600 (approx).
