

Start' button is coming back

Microsoft is bringing back the 'Start' button in Windows 8.1, but it will lead to same Metro UI and not Start Menu

Facebook Virus!

Symantec has identified Trojan.Zbot malware called 'Zeus' which is already floating on Facebook and may clean your bank account

Corsair H80i

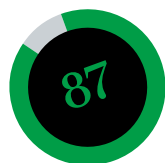

A great performer!

Price
₹7,425

no. of the cooler signifies the inclusion of Corsair LINK, which helps to digitally monitor and control this cooler using the LINK system software. With the exception of a larger radiator, the H80i shares everything else

When it comes to CPU cooling, it is well known that the greater the surface area, better the heat dissipation. The H100i we tested previously contributed to this fact with the help of its large 240mm radiator. We now have the H80i, another all-in-one liquid cooler from Corsair and the radiator on the H80i has twice the width of the H100i but its dimensions reside in the 120mm territory. The "i" moniker on the model

Umax Boombastic USP 3200

Only if you're on a really tight budget

Price
₹2,500

If you're expecting high fidelity audio from a speaker in this price range you're already barking up the wrong tree. But of course not everyone has deep pockets and sometimes you need to consider speakers in the sub 2k price bracket. The USP 3200 speaker set is tinny and sibilant, both undesirable qualities in any speaker. There's also a fair bit of distortion. The speaker looks quite decent and we quite like the woofer grille and the cloth-covered satellites. Regardless, we can't stress this enough, buy this only if you're on a really tight budget.

Signature Acoustics C12

Indigenous in-ears

Price
₹3,500

Right from the packaging, the brass hard-case, and to lacquered wooden driver housings, the C-12 exudes quality. To test their performance, we tried them on a number of portable sources and our ASUS Xonar Essence STX. They aren't at all difficult to drive, but the bass is pumped up and they're a little too warm. Not very impressive sadly and they don't live up to the "forum" hype. Most of our test tracks, especially in the heavier genres, sounded fuzzy. Triphop or EDM fans however won't be disappointed. But be warned these are not reference-grade monitors. The street price for these IEMs is somewhere in the region of ₹2,700. In this regard the cheaper Cowon EMI scores slightly better over the C12 in most parameters.
