KILL THE IDIOT BOX

We list online services that will keep you away from the TV for good. You've been warned.

Ekta T

readersletters@thinkdigit.com

Since time immemorial, rather since 1926, TV has been an integral part of our life. In fact, the invention of television immediately turned our three basic necessities into four – food, clothing, shelter and the idiot box with a cable connection. Life seemed perfect. Until the mother of all convenience happened – the Internet.

So what changed suddenly? The Internet's convenience trounced our love affair with the beloved idiot box. This brand new entertainment option (powered by the Internet) offered the convenience of watching our favourite shows & movies as per our whims and wishes. With video-on demand services and content streaming websites, we are truly bound by nothing. Be it your laptop, PC, iPads, tablets or even your smartphone, online streaming services serve HD content to most devices. TV, as we know it, can't stay relevant any longer.

Are these services compelling enough to get rid of your cable connection? Is it time to let go of your beloved TV set? We try and answer some of these questions.

Video-on-Demand

As the name suggests, video-on-demand services let you stream content of your choice across various categories like news, entertainment, sports and more, on the Internet. Although most DTH connections provide the option of movies-on-demand,

the variety of movies offered is quite limited. Unlike the cable connection, wouldn't it make sense to turn to a service that provides you a gamut of options without burning a hole through your pocket?

Here are a bunch of video-on-demand services you can turn to in order to get rid of your DTH cable provider:

BIGFlix Movie –on-demand

www.bigflix.com

Available: PC, Android, iTunes, Windows Phones & tablets. Coming soon to BlackBerry.

Damage: In 2011, BIGFlix decided to discontinue its DVD rental business and dived into the online movies-on-demand business. BIGFlix.com lets you choose from over two thousands movie titles in Hindi, Telugu, Malayalam and a few titles in English and Spanish, as well. Be it your tablet or mobile phone, BIGFlix lets you watch full-length movies on any device, as long as you're connected to the Internet. Plans start at ₹249/month and go on to ₹1,799/year. Bollywood junkie? Then you

should sign up for a BIGFlix account. Although a few titles are unavailable in HD, the website's flexible yet affordable monthly plans make up for it all. Plus, it's ad-free!

YouTube Events & music

www.youtube.com/live

Available: On every platform

YouTube has got to be the best free online streaming service. Be it an IPL match or Finance Minister's Budget speech, from sports, entertainment to news and funny videos, Google owned YouTube has content on everything. Most LIVE events are streamed online, thanks to YouTube's LIVE channel. YouTube LIVE gives the access to numerous LIVE feeds, news and events with unlimited streaming time, at absolutely no cost. The icing on the cake is that all the LIVE feeds are available in HD (720p), which makes it a far better alternative than TV, especially for sporting events.

VPN Hack for Netflix & Hulu International TV Shows, Movies

www.netflix.com

VPN Provider – Hot Spot Shield: www.hotspotshield.com

Damage: Find!

Online streaming websites like Netflix & Hulu are big in the US, offering TV shows, movies, webisodes, behind the scenes footage from likes of Fox, HBO, ABC and others. However, these US streaming websites are blocked by IP address loca-
